Class meeting time and place: MWF 9:45am and T/TH 9:30-10:45 – Math Bldg Room 209

Additional Help:  
Free tutoring is available from the AARC. The AARC is located in the library on the SFA campus. They offer one-on-one peer tutoring, the Math Walk-in Table, Power Hours, and Learning Teams.

- The hours for the Walk-in Table are 1pm to 8pm Monday through Thursday as well as 4pm to 8pm on Sundays.
- Power hours are TBA.
- Sign-ups for Learning Teams occurs during open enrollment. The first open enrollment is January 23-24, 11am-6pm.

It is a first-come, first-serve basis so you may want to register early. If you need help signing up, the AARC staff (first floor of library, right-hand side) will be happy to assist. You can find more information on the AARC website, www.sfasu.edu/aarc.

Course Description:  
Mathematical functions and graphs, linear systems of equations, matrices, linear programming, mathematics of finance; applications.

Text and Materials:
- The textbook is Finite Mathematics with Applications in the Management, Natural, and Social Sciences, 12th Edition, by Lial, et al. Chapters 1 through 7 will be covered in this course.
- Notes will be posted on d2l for each section that we cover. You are responsible for printing them and bringing them to class.
- You will need a calculator for this class. Graphing calculators are allowed but not required; a scientific calculator is sufficient. The calculator function of a cell phone will not be permitted during tests or in-class quizzes.
  - Recommendations: TI-30XS Multiview, TI-30X IIS, or TI-34 Multiview

Course Requirements:
- **Three in-class exams**—If a student must miss an exam due to an excused absence, the final exam will replace the missed exam grade. **There are no make-up exams! No cell phone will be allowed on exams.** You will need to bring your own scientific calculator to exams. No additional time will be given on exams. [CO 1, 2, 3]

- **Homework**—We will assign exercises from each major topic in the course calendar/outline through the online homework system MyMathLab. [CO 1, 2, 3]

- **Quizzes**—We will have regular quizzes given through the online homework system MyMathLab. [CO 1, 2, 3]

- **A comprehensive final exam**—The final exam grade can be used to replace a low or missing exam grade. The scheduled time for the final exam is as follows: Section 6: Tuesday, 10:30-12:30, May 14, 2019 [CO 1, 2, 3]

- **Class attendance and participation**—Students are expected to attend all class meetings, arriving on time. If you are absent, you are responsible for determining what you missed and for being prepared for class when you return. Leaving class early without notifying the professor in advance will result in your being counted absent for the
class session. Students that sleep in class, send or receive text messages, or conduct other online activities not directly related to class will be counted absent.

- **Preparing for class**—Students should be prepared to invest several hours per day outside of class reading the text, practicing examples, and working homework exercises. *Material to be discussed in class should be read before coming to class.* Check your university email regularly, as I may send reminders, assignments, or announcements.

- **Core Curriculum Assessment**—By enrolling in MTH 143 you are also enrolling in a Core Curriculum Course that fulfills one of the core objectives requirement. You will see this course on your D2L list. At one point during the semester, you will receive an assignment that fulfills both the requirements of this course and the needs of Stephen F. Austin State University’s Core Curriculum Assessment Plan with the Texas Higher Education Coordinating Board. When you complete this one assignment, you need to upload the assignment to both your standard course dropbox determined by your Instructor and the “Core Curriculum” dropbox. The Core Curriculum dropbox will be identified by the Objective for which work is being collected. (Examples: Empirical & Quantitative Skills) Please note that this only applies to the approved assignment. All other assignments should be submitted according to regular class operations. If you have any questions, please see your Instructor or the Office of Student Learning and Institutional Assessment. Due Date: April 24, 2019.

**Grading Policy:** The semester grade will be determined using the following formula: Semester Grade = .20(Daily) + .60(Semester Exams) + .20(Final Exam)

Your final grade will be determined as follows:

- **20% Daily Average** 90% - 100% A
- **60% Tests (3 @ 20% each)** 80% - 90% B
- **20% Comprehensive Final Exam** 70% - 80% C
- **100% Final Course Grade** 60% - 70% D
 0% - 60% F

20% of your grade will be determined by your daily average. (10% Homework/10% Quizzes). This will include in-class activities, worksheets, quizzes, homework assignments, etc. **In-class activities, worksheets, and quizzes cannot be made up. Homework assignments will not be accepted late.** However, I will drop one or two of the daily grades at the end of the semester.

Online homework/quizzes will be due **daily!!!**

- **Student Drops:** Students should note that co-requisite courses **CANNOT** be dropped!
- **Grade Requirement:** Students must score a “C” or higher if this course is a prerequisite for another course or if course is required within the major.
- **Intervention Activity Requirement:** If your instructor recognizes failure warning signs, you will be required to participate in intervention activities determined by your instructor. Failure to do so will result in a reduction of your grade as not completing these required activities will result in a grade of zero on the activities.
- **Attendance Bonus:** Students who have fewer than three absences (2 or less) will be awarded 2 percentage points at the end of the semester. The only exception will be absences excused for approved school functions. Other absences (excused or not) will be counted in your absence total. Participating in class and asking questions to receive the benefit of understanding the material is of utmost importance.

**Attendance Policy**

- Attendance is expected and recorded for all students. Attendance will not be formally factored into your course grade, however, missing in-class activities, quizzes, etc, could lower your daily average. Also, missing classes will significantly reduce the instruction you receive, and will therefore naturally decrease your semester grade.
- You must make a commitment to attend every class, to arrive on time and to stay the entire time. Bring all necessary materials to each class, be attentive to the task at hand, take notes, and be prepared to participate in class discussions. You must make an additional commitment of doing work outside of class - one to two hours every day. Most importantly, ask for help when you need it.
The following is an excerpt from SFA Policy 5.4:

The federal definition of a credit hour is an amount of work represented in intended learning outcomes and verified by evidence of student achievement that is an institutionally established equivalency that reasonably approximates:

1. Not less than one hour of classroom or direct faculty instruction and a minimum of two hours out-of-class student work each week for approximately fifteen weeks for one semester or trimester hour of credit, or 10 to 12 weeks for one quarter hour of credit, or the equivalent amount of work over a different amount of time, or;
2. At least an equivalent amount of work as outlined in item 1 above for other academic activities as established by the institution including laboratory work, internships, practica, studio work, and other academic work leading to the award of credit hours.

To this end, all students in courses offered by the Department of Mathematics and Statistics that wish to be successful should plan to spend a minimum of two hours outside of class for every credit hour associated with this course. Expected activities to be completed in the time outside of class include reviewing notes from previous class meetings, reading assigned course resources, completing all assigned exercises and projects, and performing periodic assessment preparation.

See [http://www2.sfasu.edu/math/docs/syllabi/MTH143Syllabus.pdf](http://www2.sfasu.edu/math/docs/syllabi/MTH143Syllabus.pdf) for elements common to all sections.

### Tentative Course Calendar

<table>
<thead>
<tr>
<th>Week</th>
<th>Topics</th>
</tr>
</thead>
</table>
| 1    | Syllabus/ Graphs (2.1)  
      | Functions/ Graphs of Functions (3.1,3.2) |
| 2    | First Degree Equations (1.6)  
      | Equations of Lines/ Linear Models (2.2,2.3) |
| 3    | Applications of Linear Functions (3.3)  
      | Systems of Two Linear Equations/Applications (6.1,6.3) |
| 4    | Exam 1 Review  
      | Exam 1: Thursday, February 14 |
| 5    | Graphing Linear Inequalities in Two Variables (7.1)  
      | Linear Programming: Graphical Method/Applications (7.2,7.3)  
      | Basic Matrix Operations (6.4) |
| 6    | Matrix Products (6.5)  
      | Gauss Jordan Elimination (6.2)  
      | Applications of Systems of Linear Equations (6.3) |
| 7    | The Simplex Method: Maximization (7.4)  
      | Maximization Applications (7.5) |
| 8    | Exam 2 Review  
      | Exam 2: Thursday, March 14 |
| 9    | SPRING BREAK!!! 😄 |
| 10   | Quadratic Equations (1.7)  
      | Quadratic Functions/Applications (3.4)  
      | Exponential Functions/Applications (4.1,4.2) |
| 11   | Logarithmic Functions (4.3) |
| 12   | Logarithmic/Exponential Equations (4.4)  
      | Exam 3 Review |
| 13   | Exam 3: Tuesday, April 16/ Easter Holiday!!! |
| 14   | Simple Interest/Compound Interest/Annuities, Future Value, and Sinking Funds (5.1,5.2,5.3)  
      | Present Value and Amortization (5.4) |
| 15   | Final Exam Review |
| 16   | Final Exam: Wednesday, May 15, 8:00am-10:00am |
Course description: Mathematical functions and graphs, linear systems of equations, matrices, linear programming, mathematics of finance; applications.

Core Objectives (CO):
1. Critical Thinking [CO 1]: to include creative thinking, innovation, inquiry, and analysis, evaluation and synthesis of information
2. Communication Skills [CO 2]: to include effective development, interpretation and expression of ideas through written, oral and visual communication
3. Empirical and Quantitative Skills [CO 3]: to include the manipulation and analysis of numerical data or observable facts resulting in informed conclusions

Credit hours: 3

The following is an excerpt from SFA Policy 5.4:
The federal definition of a credit hour is an amount of work represented in intended learning outcomes and verified by evidence of student achievement that is an institutionally established equivalency that reasonably approximates:

1. Not less than one hour of classroom or direct faculty instruction and a minimum of two hours out-of-class student work each week for approximately fifteen weeks for one semester or trimester hour of credit, or 10 to 12 weeks for one quarter hour of credit, or the equivalent amount of work over a different amount of time, or;
2. At least an equivalent amount of work as outlined in item 1 above for other academic activities as established by the institution including laboratory work, internships, practica, studio work, and other academic work leading to the award of credit hours.

To this end, all students in courses offered by the Department of Mathematics and Statistics that wish to be successful should plan to spend a minimum of two hours outside of class for every credit hour associated with this course. Expected activities to be completed in the time outside of class include reviewing notes from previous class meetings, reading assigned course resources, completing all assigned exercises and projects, and performing periodic assessment preparation.

Course Prerequisites and Corequisites: See general course prerequisites.

General Education Core Curriculum: This course has been selected to be part of SFA’s core curriculum. The Texas Higher Education Coordinating Board has identified six objectives for all core courses: Critical Thinking Skills, Communication Skills, Empirical and Quantitative Skills, Teamwork, Personal Responsibility, and Social Responsibility. SFA is committed to the improvement of its general education core curriculum by regular assessment of student performance on these six objectives. Assessment of these objectives at SFA will be based on student work from all core curriculum courses. This student work will be collected in D2L, the assessment management system selected by SFA to collect student work for core assessment.

The chart below indicates the core objectives identified by SFA to be assessed in this course. The instructor of each section of the course will provide the assignment(s) that will be used to assess the objectives as well as the date(s) by which the assignments must be completed and uploaded in D2L.

<table>

</table>
Course outline:  

- Functions [CO: 1,2,3]  
  o Linear Functions  
  o Quadratic Functions including Maxima and Minima  
  o Logarithmic Functions and solutions to logarithmic equations  
  o Applications (e.g. break-even analysis, supply and demand)  

- Matrices [CO: 1,2,3]  
  o Operations of Matrices  
  o Gauss-Jordan Elimination  
  o Inverse of Square Matrices  
  o Applications (e.g. systems of equations)  

- Linear Programming [CO: 1,2,3]  
  o Graphical Method  
  o Simplex Method  
    ▪ Maximization  
    ▪ Duality and Minimization  
    ▪ Mixed Constraints (Optional)  

- Mathematics of Finance [CO: 1,2,3]  
  o Simple Interest  
  o Compound Interest  
  o Annuities  
    ▪ Ordinary Annuities; Future Value and Present Value  
    ▪ Annuities Due; Future Value and Present Value  
    ▪ Deferred Annuities; Present Value  
    ▪ Loans and Amortization  

- Explicit instruction in Critical Thinking, Communication and Empirical and Quantitative Reasoning is in addition to implicit instruction, modeling and practice that occur daily in the discussion functions, matrices, linear programming and the mathematics of finance. This explicit instruction includes explanation of solving mathematical problems by thinking critically, communicating logically ordered solutions with complete and correct notation, and applying empirical or quantitative skills as appropriate to the problem.

Academic Integrity  
Academic integrity is a responsibility of all university faculty and students. Faculty members promote academic integrity in multiple ways including instruction on the components of academic honesty, as well as abiding by university policy on penalties for cheating and plagiarism.

Definition of Academic Dishonesty (SFA policy 4.1):  
Academic dishonesty includes both cheating and plagiarism. Cheating includes, but is not limited to:  
- using or attempting to use unauthorized materials on any class assignment or exam;  
- falsifying or inventing of any information, including citations, on an assignment;  
- helping or attempting to help other student(s) in an act of cheating or plagiarism.  

Plagiarism is presenting the words or ideas of another person as if they were one’s own. Examples of plagiarism include, but are not limited to:  
- submitting an assignment as one’s own work when it is at least partly the work of another person;  
- submitting a work that has been purchased or otherwise obtained from the Internet or another source;  
- incorporating the words or ideas of an author into one’s paper or presentation without giving the author credit.  

Penalties may include, but are not limited to, reprimand, no credit for the assignment or exam, resubmission of the work, make-up exam, failure of the course, or expulsion from the university.
Withheld Grades Semester Grades (SFA Policy 5.5)
Ordinarily, at the discretion of the instructor of record and with the approval of the academic chair/director, a grade of WH will be assigned only if the student cannot complete the course work because of unavoidable circumstances. Students must complete the work within one calendar year from the end of the semester in which they receive a WH, or the grade automatically becomes an F. If students register for the same course in future terms the WH will automatically become an F and will be counted as a repeated course for the purpose of computing the grade point average. The circumstances precipitating the request must have occurred after the last day in which a student could withdraw from a course. Students requesting a WH must be passing the course with a minimum projected grade of C.

Students with Disabilities
To obtain disability related accommodations, alternate formats and/or auxiliary aids, students with disabilities must contact the Office of Disability Services (ODS), Human Services Building, and Room 325, 468-3004 / 468-1004 (TDD) as early as possible in the semester. Once verified, ODS will notify the course instructor and outline the accommodation and/or auxiliary aids to be provided. Failure to request services in a timely manner may delay your accommodations. For additional information, go to http://www.sfasu.edu/disabilityservices.

Acceptable Student Behavior
Classroom behavior should not interfere with the instructor’s ability to conduct the class or the ability of other students to learn from the instructional program (see the Student Conduct Code, policy 10.4). Unacceptable or disruptive behavior will not be tolerated. Students who disrupt the learning environment may be asked to leave class and may be subject to judicial, academic or other penalties. This prohibition applies to all instructional forums, including electronic, classroom, labs, discussion groups, field trips, etc. The instructor shall have full discretion over what behavior is appropriate/inappropriate in the classroom. Students who do not attend class regularly or who perform poorly on class projects/exams may be referred to the Early Alert Program. This program provides students with recommendations for resources or other assistance that is available to help SFA students succeed.

Student Learning Outcomes (SLO): At the end of MTH 143, a student who has studied and learned the material should be able to:

1. Use linear functions and quadratic functions in business applications. [CO: 1,2,3]
2. Use matrices to solve systems of linear equations. [CO: 1,3]
3. Use matrices to solve linear programming problems. [CO: 1,3]
4. Use exponential functions and logarithmic functions and to solve equations using these functions. [CO: 1,2,3]
5. Solve simple interest and compound interest problems including annuities. [CO: 2,3]

There are no specific program learning outcomes for this major addressed in this course. It is a general education core curriculum course and/or a service course.

Date of document: 01/11/2019
