COURSE SYLLABUS
Intermediate Accounting
Accounting 3301.520
Fall 2020

Instructor: Stephanie Ross, Ph.D, CPA, MBA
Department: Gerald W Schlief School of Accountancy
Office: 292C
Phone: 936.468.1595 my office
936.468.3105 accounting department (leave message)
E-mail: Stephanie.Ross@sfasu.edu (USE SFA EMAIL ONLY)
Online Office Hours: T/R 9:15-10:45am; 12:15pm-1:45pm
W 10:00am – 2:00pm
Other times by appointment only
Class Hours: ACC 3301.520 – On-line Only
Prerequisite: 2302

Course Materials:
Intermediate Accounting, Spiceland, Sepe, & Nelson, 10th Edition — the textbook may be electronic or hardcopy but students tend to benefit most from bringing a hardcopy to class McGraw Hill Connect access code (online management system for above listed textbook).
Sharp EL-233S or Casio HS-8VA calculator or any simple calculator

Course Coverage:
Study and application of generally accepted accounting principles in the accounting process and statement preparation.

Course Objectives:
Accounting 3301 will review the accounting environment, the basic accounting model, the accounting information system, basic financial statements and the specific topics of time value of money, cash, accounts receivable, inventories, operational and intangible assets and revenue recognition.

Totally On-line Format for Fall 2020:
This course follows an asynchronous on-line format in which the entire course will be conducted as an online class. This means that you will be provided links for pre-recorded PowerPoint lectures and Work-out Problem lectures to view and complete by the assigned deadline listed at the end of this document. The due dates for the associated chapter assignments are located in this Syllabus as well.

Time Requirement:
The time requirement to earn an above average grade in this course is significant, although it may vary for each student. Students should be prepared to spend 9-12 hours total per week, per chapter. In order to succeed in this course, it is important for students to understand the demanding nature of accounting and be willing to devote the necessary time and effort. The better you perform in this course will most likely result in enhanced performance in future financial accounting classes.

Cheating and Plagiarism:
Cheating and/or plagiarism will not be tolerated. If a student or students are proved to have cheated or plagiarized material, a grade of “F” will be given for the assignment and, in certain cases, a grade of “F” may be awarded for the course. See also “Academic Integrity.”

Exams:
Every effort will be made to give exams on the scheduled dates per the Syllabus. All dates are tentative and subject to change. Exams will be given online through ExamSoft. This is a new exam platform that we will use for Intermediate 1, starting this semester. We will have a mock test run of ExamSoft to familiarize you with the system.
In addition, students MUST use either a simple calculator or the online calculator provided in ExamSoft to take ALL exams. No electronic devices of any kind may be used for any purpose during an exam.
Chapter Smartbook Activities:
Chapter Smartbook activities are due in Connect on the stated due date. These activities help you practice the concepts and objectives taught in the chapter readings and interactive lecture activities and aid in preparing the student for the chapter homework and exams. You will continue to work through these activities until you have successfully completed each assignment. Please note the amount of time to complete these activities varies by chapter. If you have not read the chapter and become familiar with the content FIRST, these activities will take much more time than they are structured to take. There is a tutorial in Connect that gives step by step instructions for successful completion of these activities. It is highly recommended you take the time to work through the tutorial rather than just assume you are properly completing the assignment.

Homework:
All homework assignments are due in Connect on the stated due date. These assignments allow the student to practice the concepts taught in each chapter and aid in preparing for the exams. I highly recommend the student work the problems out by hand BEFORE entering the answer in Connect as this will help to learn and understand the concepts AND prepare for exams as work will have to be shown on exams rather than just giving a final answer. You will have 3 attempts to successfully complete these assignments and the highest grade will be recorded. No homework assignments will be accepted late, nor will they be accepted in writing.

Accounting Cycle Assignment:
The students’ ability to understand and apply the concepts learned in ACC2301 is critical to successful completion of this course. To reinforce the concepts learned in ACC2301, an accounting cycle problem is located in Connect and will be available the first day of class and due when chapter 2 homework is due (see course timeline). This gives the student plenty of time to successfully complete it and ask any questions. This is a REQUIRED, GRADED assignment (see Course Requirements). Since this assignment is due along with chapter 2 homework, it is highly recommended not to wait until the night before to complete it. It is a lengthy algorithmic problem. You will have unlimited attempts to successfully complete this assignment.

Extra Credit/Bonus Opportunities:
Throughout the semester, there will be bonus assignments found in Connect. These assignments will clearly be marked as “Bonus.” The due date for each assignment will be the same due date as for that particular chapter (i.e. if chapter 2 homework is due October 22nd the extra credit assignment for chapter 2 will also be October 22nd). Each extra credit problem point value will vary. These points will be added to your exam points which will help to increase your overall exam average. A total of 25 points can be earned by successfully completing ALL bonus assignments. Partial credit will be given. You will be allowed two attempts to complete each assignment and the highest grade will be recorded. These assignments not only provide bonus points, they also help to learn, reinforce and apply the concepts for that particular chapter.

In addition, the lowest homework and Smartbook grades will be dropped. Allowing three attempts to complete your homework gives the student every opportunity to make a perfect score if they so choose. The accounting cycle assignment can be completed unlimited times to obtain a perfect score. Additional opportunities for bonus points may be given randomly throughout the semester and will be announced in class and/or Brightspace/D2L. Therefore, there will not be one magic assignment at the end of the semester to regain all the points you did not take advantage of during the semester. So, please do NOT ask.

Brightspace/D2L:
In addition to class time and office hours, the Brightspace/D2L News Feed will be used as my primary source of communication. Course materials, announcements and various information will be posted to the Brightspace/D2L home page for this class. Student grades will also be posted in Brightspace/D2L. It is the student’s responsibility to see that they have access to Brightspace/D2L for this class. In addition, PLEASE SEND ALL EMAILS TO THE INSTRUCTOR VIA SFA EMAIL, NOT BRIGHTSPACE/D2L.
Additional Assistance:
A supplemental instruction (SI) sessions will be made available for interested students. Specific details regarding when and where these opportunities will take place will be discussed in class and posted in Brightspace/D2L. These are all superb options to enhance your understanding of the topics learned in this class and ultimately boost your grade.

Grades:
Grades will be posted in Brightspace/D2L upon completion of grading. Brightspace/D2L is your “official” gradebook. The student must notify the instructor within one week of the grade being posted in Brightspace/D2L if they have a question about the grade in order for any grade adjustment to be considered. Waiting until the end of the semester is too late.

Overall Exam Average:
At the end of the semester, students MUST have an OVERALL exam average of at least a 60 percent in order to pass this course. This grade is calculated by adding ALL four exam scores (along with any bonus points you earned through the bonus opportunities included in Connect ONLY) and dividing by the total possible points for these same exams (which will be 430). If the overall exam average calculation is below a 60 percent at the end of the semester, the student automatically makes an “F” for the course regardless what other grades the student has received on other assignments. See also “Course Requirements.”

Extenuating Circumstances/Emergencies/Ilnesses:
In addition to contacting the instructor, the student must immediately contact the Office of Student Rights and Responsibilities at 936.468.2703 if at any time during the semester an unanticipated circumstance causes the student to fall behind in class. However, once an assignment(s) is CLOSED, it is too late to ask for any consideration. Therefore, you MUST notify the instructor BEFORE the assignment(s) is CLOSED. Otherwise, the situation will be given no consideration. Understand that each situation will be handled on an individual basis.

Technical Problems:
Although technical problems are no excuse for unfinished assignments, in the event the student should encounter technical difficulties, the student must notify Connect support AND the instructor IMMEDIATELY when the problem occurs in order for the situation to be given any consideration at all. IF THE STUDENT WAITS UNTIL THE ASSIGNMENT HAS CLOSED TO REPORT THE PROBLEM, THE ASSIGNMENT WILL NOT BE REOPENED. The student should report the issue by either calling my office or by email. If the student has a problem with Connect, he/she should call 1.800.331.5094 or contact them online at www.mhhe.com/support. Connect has night and weekend hours. When contacting Connect technical support, they will provide a case number which must be included with the correspondence to the instructor. Those that do not follow these instructions will be given NO consideration. Understand that each situation will be handled on an individual basis.

Program Learning Outcomes:
Program learning outcomes define the knowledge, skills, and abilities students are expected to demonstrate upon completion of an academic program. These learning outcomes are regularly assessed to determine student learning and to evaluate overall program effectiveness. You may access the program learning outcomes for your major and particular courses at http://www.sfasu.edu/cob/ug-plo.asp.

General Student Policies
Academic Integrity (4.1):
Academic integrity is a responsibility of all university faculty and students. Faculty members promote academic integrity in multiple ways including instruction on the components of academic honesty, as well as abiding by university policy on penalties for cheating and plagiarism.

Definition of Academic Dishonesty:
Academic dishonesty includes both cheating and plagiarism. Cheating includes, but is not limited to (1) using or attempting to use unauthorized materials on any assignment or exam; (2) falsifying or inventing of any information, including citations, on an assigned exercise; and/or (3) helping or attempting to help another in an
act of cheating or plagiarism. Plagiarism is presenting the words or ideas of another person as if they were one’s own. Examples of plagiarism include, but are not limited to (1) submitting an assignment as if it were one's own work when is at least partly the work of another person; (2) submitting a work that has been purchased or otherwise obtained from the Internet or another source; and/or (3) incorporating the words or ideas of an author into one's paper without giving the author credit. Penalties may include, but are not limited to reprimand, no credit for the assignment or exam, re-submission of the work, make-up exam, failure of the course, or expulsion from the university. Please read the complete policy at http://www.sfasu.edu/policies/student_academic_dishonesty.pdf.

Course Grades (University Policy 5.5):
At the discretion of the instructor of record and with the approval of the academic unit head, a grade of WH will be assigned only if the student cannot complete the course work because of unavoidable circumstances. Students must complete the work within one calendar year from the end of the semester in which they receive a WH, or the grade automatically becomes an “F”, except as allowed through policy related to active military service. If students register for the same course in future semesters, the WH will automatically become an “F” and will be counted as a repeated course for the purpose of computing the grade point average. Please refer to the complete policy at http://www.sfasu.edu/policies/course-grades.pdf.

Students with Disabilities:
To obtain disability related accommodations, alternate formats and/or auxiliary aids, students with disabilities must contact the Office of Disability Services (ODS), Room 325 in the Human Services Building, 468-3004/468-1004 (TDD) as early as possible in the semester. Once verified, ODS will notify the course instructor and outline the accommodation and/or auxiliary aids to be provided. Failure to request services in a timely manner may delay your accommodations. For additional information, go to http://www.sfasu.edu/disabilityservices/.

Student Conduct (University Policy 10.4):
Classroom behavior should not interfere with the instructor’s ability to conduct the class or the ability of other students to learn from the instructional program (see the full Student Conduct Code at http://www.sfasu.edu/policies/student-conduct-code.pdf.) Unacceptable or disruptive behavior will not be tolerated. Students who disrupt the learning environment may be asked to leave class and may be subject to judicial, academic, or other penalties. This prohibition applies to all instructional forums, including electronic, classroom, labs, discussion groups, field trips, etc. The instructor shall have full discretion over what behavior is appropriate/ inappropriate in the classroom. Students who do not attend class regularly or who perform poorly on class projects/exams may be referred to the iCare Early Alert Program. This program provides students with recommendations for resources or other assistance that is available to help SFA students succeed.
