Class Syllabus / Policy

JacksTeach Functions and Modeling

JTCH 3351
Fall 2020

Name: Jane Long, Ph.D. Mathematics
Department: Mathematics and Statistics
Email: longjh@sfasu.edu
Phone: 936-468-1804
Office: Bush Math. Bldg, 318

Name: Stacia Prince, MS Mathematics
Department: Mathematics & Statistics
Email: princes@sfasu.edu
Phone: 936-468-6262
Office: Bush Math. Bldg. 103J or 334

Office Hours:
Monday: 10:30-11:00am, 11:50am-1:00pm, 2:15-2:45pm
Tuesday: 10:30-11:00am, 12:15-12:45pm
Wednesday: 10:30-11:00am, 11:50am-1:00pm, 2:15-2:45pm, 3:30-4:00pm, 5:15-5:45pm
Thursday: 10:30-11:00am: 12:15-12:45pm

Dr. Long and Mrs. Prince are available at other times by appointment. Office hours will be conducted via Zoom. Please request an appointment outside of the times listed above if you need to have a confidential conversation. Notice that Dr. Long is always available 30 minutes before and after class.

Class meeting time and place: MW 1:00-2:15pm, Bush Mathematics Bldg. Room 123

Prerequisite:
JTCH 1102; and Math 2413 or concurrent enrollment; or permission of JacksTeach co-director

Course Description
Functions and Modeling is designed to provide an in-depth study of topics in secondary school mathematics. Emphasis in modeling with linear, exponential, and trigonometric functions; curve fitting; discrete and continuous models; inquiry-based and project-based teaching modalities. Use of appropriate technology is also explored.

SFASU Policy 5.4: The federal definition of a credit hour is an amount of work represented in intended learning outcomes and verified by evidence of student achievement that is an institutionally established equivalency that reasonably approximates:

1. Not less than one hour of classroom or direct faculty instruction and a minimum of two hours out-of-class student work each week for approximately fifteen weeks for one semester or trimester hour of credit, or 10 to 12 weeks for one quarter hour of credit, or the equivalent amount of work over a different amount of time; or

2. At least an equivalent amount of work as outlined in item 1 above for other academic activities as established by the institution including laboratory work, internships, practica, studio work, and other academic work leading to the award of credit hours.
To this end, all students who wish to be successful should plan to spend at least two hours outside of class for every credit hour associated with this course. Expected activities to be completed in the time outside of class include reviewing notes from previous class meetings, reading assigned course resources, completing all assigned exercises and projects, and performing periodic assessment preparation.

Program Learning Outcomes

The successful JacksTeach candidate will:

1. Demonstrate a deep understanding of and ability to apply STEM content and foundational pedagogical content knowledge through effective teaching in K-12 classrooms; (Texas Teacher Standards 1, 2, 3, 4; Texas PPR Standards I, IV; Texas Science Standards I-IV, VI, XI)

2. Develop an effective classroom management plan that creates a STEM classroom environment conducive to active learning and inquiry techniques, and supportive of individual and collaborative learning; (Texas Teacher Standards 1, 2, 4; Texas PPR Standards II, III; Texas Science Standards I-V, VII)

3. Use a variety of instructional strategies to meet the needs of all students and inspire STEM learners to develop curiosity about local and global issues and the connections to STEM, through the application of critical thinking, creativity, problem solving, and technology; (Texas Teacher Standards 1, 2, 4; Texas PPR Standards II, III; Texas Science Standards I-IV, VI-VII, XI)

4. Implement a variety of assessment techniques to monitor learner progress and guide adaptation of instructional plans; and (Texas Teacher Standards 3, 5; Texas PPR Standards I, III, IV; Texas Science Standards IV-V)

5. Exhibit a disposition toward continued learning and professional growth through the utilization of self-evaluation and research-based practices. (Texas Teacher Standards 5, 6; Texas PPR Standards I, IV; Texas Science Standards IV-V)

Student Learning Outcomes

After completing the required readings and participating in class activities, the prospective mathematics or science educator will be able to do the following:

1. Deepen and broaden function-related mathematical content knowledge from Algebra through Calculus by exploring relevant topics in an inquiry based learning situation. (PLO 1, 5)

2. Make connections between college mathematics and secondary school mathematics. (PLO 1, 5)

3. Build preliminary knowledge of professional and state mathematics curriculum standards. (PLO 1, 5)

4. Use reflective and collaborative learning, and develop a stronger sense of professionalism and leadership. (PLO 1, 5)

5. Create efficient seekers of content knowledge. (PLO 1, 3, 5)

6. Explore and learn appropriate use of technology in the mathematics classroom. (PLO 1, 3, 5)
* A complete listing of all educator preparation standards this course meets and a list of the key assessments used for program accreditation purposes can be found at: (www.sfajacksteach.org)

Text and Materials
You will download the required textbook as a PDF file from D2L.

Class Attendance and Participation Policy
Since a majority of this work hinges on group work done during the class time, attendance and presentation of results of class Explorations is of utmost importance. Therefore, attendance is extremely important and you are expected be in class each and every day.

Attendance Policy:
- Please keep in communication with the instructors about all absences. If you cannot attend class at the scheduled time, you must
  1. View the Zoom recording and materials from the day
  2. Contact the instructors as soon as possible
- If you must miss a scheduled appointment with the instructors, please let them know as soon as possible
- Missing an exam or presentation is much more problematic than missing a regular class meeting or an appointment, and you should not miss exam or presentation days unless the situation is very serious. If you miss an exam or presentation and do not communicate with the instructors as soon as possible, you risk failing the course.
- Come to class prepared and ready to listen, participate, and engage with the activities for the day
- The university’s Attendance and Excused Absences Policy can be found at http://www.sfasu.edu/policies/class_attendance_excused_abs.asp

We will meet via Zoom until at least October. At that time, we will reevaluate and see if meeting face-to-face makes sense. If we do meet face-to-face, we will meet in Mathematics Building room 123. If face-to-face meetings occur, students and instructors must follow:

COVID-19 MASK POLICY
Masks (cloth face coverings) must be worn over the nose and mouth at all times in this class and appropriate physical distancing must be observed. Students not wearing a mask and/or not observing appropriate physical distancing will be asked to leave the class. All incidents of not wearing a mask and/or not observing appropriate physical distancing will be reported to the Office of Student Rights and Responsibilities. Students who are reported for multiple infractions of not wearing a mask and/or not observing appropriate physical distancing may be subject to disciplinary actions.

Grading Policy:
Tests (TH – October 15 and TH – November 19)  40 %
Written Assignments/Labs/Homework  25 %
Attendance /Engagement and Contribution  10 %
Midterm Project*  10 %
Final  15 %
Total: 100 %

*Midterm Project Fall 2020
You will explore the beauty of mathematics. Details will be given later.

Final Grades will be determined by:
The standard university A, B, C, D, F grading system will be employed.

Late Work
In general, late work will not be accepted. One half of the assigned points will be deducted for work that is submitted after the due date if there is a legitimate excuse.

Major Topics:
  Functions and Relations
  Qualitative Graphing
  Sequences/Patterns – Function Patterns
  Mathematical Modeling - Data, & Regression, Matrices
  Polar & Parametric Relations
  Complex Numbers and Properties
  Exponential growth and Decay Models

Tests/Labs/Homework:
There will be frequent homework assignments, labs, and exams to test your knowledge of the concepts we are currently discussing in class. Tests and labs will be in class; homework needs to be finished outside of class time. You are expected to enhance classroom discussion with extended research of topics outside of the classroom. YOU ARE RESPONSIBLE FOR KNOWING ALL TECHNOLOGY TECHNIQUES PRESENTED IN CLASS.

Add/Drop Policy
The Add/Drop Policy can be found at http://www.sfasu.edu/policies/add_drop.asp

Academic Integrity (Policy A-9.1)
Academic integrity is a responsibility of all university faculty and students. Faculty members promote academic integrity in multiple ways including instruction on the components of academic honesty, as well as abiding by university policy on penalties for cheating and plagiarism.

The penalty for a student found cheating on any part of an assignment, quiz, or exam in this class will range from a grade of zero on the work to a grade of F in the course, and may result in additional, more severe disciplinary measures. A student who allows another to copy his work and the student copying the work are both guilty of cheating. Do your own work. Do not show your completed work to others. Do not allow others to copy your work.

Definition of Academic Dishonesty
Academic dishonesty includes both cheating and plagiarism. Cheating includes but is not limited to (1) using or attempting to use unauthorized materials to aid in achieving a better grade on a component of a class; (2) the falsification or invention of any information, including citations, on an assigned exercise; and/or (3) helping or attempting to help another in an act of cheating or plagiarism. Plagiarism is presenting the words or ideas of another person as if they were your own. Examples of plagiarism are (1) submitting an assignment as if it were one's own work when, in fact, it is at least partly the work of another; (2) submitting a work that has been purchased or otherwise obtained from an Internet source or another source; and (3) incorporating the words or ideas of an author into one's paper without giving the author due credit.

Please read the complete policy at http://www.sfasu.edu/policies/academic_integrity.asp.

Withheld Grades Semester Grades Policy (A-54)
Ordinarily, at the discretion of the instructor of record and with the approval of the academic chair/director, a grade of WH will be assigned only if the student cannot complete the course work because of unavoidable circumstances. Students must complete the work within one calendar year from the end of the semester in which they receive a WH, or the grade automatically becomes an F. If students register for the same course in future terms the WH will automatically become an F and will be counted as a repeated course for the purpose of computing the grade point average.

The circumstances precipitating the request must have occurred after the last day in which a student could withdraw from a course. Students requesting a WH must be passing the course with a minimum projected grade of C.

Students with Disabilities
To obtain disability related accommodations, alternate formats and/or auxiliary aids, students with disabilities must contact the Office of Disability Services (ODS), Human Services Building, and Room 325, 468-3004 / 468-1004 (TDD) as early as possible in the semester. Once verified, ODS will notify the course instructor and outline the accommodation and/or auxiliary aids to be provided. Failure to request services in a timely manner may delay your accommodations. For additional information, go to http://www.sfasu.edu/disabilityservices.

Acceptable Student Behavior (University Policy)
Classroom behavior should not interfere with the instructor’s ability to conduct the class or the ability of other students to learn from the instructional program (see the Student Conduct Code, policy D-34.1 http://www.sfasu.edu/policies/student_conduct_code.asp). Unacceptable or disruptive behavior will not be tolerated. Students who disrupt the learning environment may be asked to leave class and may be subject to judicial, academic or other penalties. This prohibition applies to all instructional forums, including electronic, classroom, labs, discussion groups, field trips, etc. The instructor shall have full discretion over what behavior is appropriate/inappropriate in the classroom. Students who do not attend class regularly or who perform poorly on class projects/exams may be referred to the Early Alert Program. This program provides students with recommendations for resources or other assistance that is available to help SFA students succeed.
