CHE 111.500 Introductory Chemistry I
Online Course
3 Credits
Spring, 2020

QUESTIONS: Please read this syllabus first and then check the Announcements and the Course Questions in D2L. If you have any questions and can’t find answers there, then email me via D2L. Thank you!

* Please remember that you are responsible for knowing and abiding by all information in this syllabus. The content and dates may be modified at the instructor’s discretion. Any changes made will be informed via course announcements in D2L.*

This syllabus is your top go-to guide for assignments and due dates. If you see something on the syllabus but cannot locate it within D2L, please do not assume the assignment has been deleted. Instead, email your instructor.

Instructor Information:

Instructor: Matibur Zamadar, Ph.D.
College: College of Sciences and Mathematics
Department: Chemistry and Biochemistry
Office: Room 104A; Chemistry
Student Hours: Monday 12:30:00 pm-2:00 pm, Tuesday 9:00-10:30 am, Wednesday 12:30 pm-2:00 pm, Thursday 10:00 am-11:00 am, Friday 12:30 am-2:00 am
Office Phone: (936)-468-2243
Email: Message me via D2L please by logging into the course and using the email icon to the top right (alternative, IF D2L is down: zamadarmr@sfasu.edu).

COURSE DESCRIPTION:
Introductory Chemistry. Introduction to the principles and concepts of chemical thought.
Co-requisite: CHE 111L. Prerequisite: eligibility for MTH 138. (Algebra). This course is intended for non-chemistry majors. Chemistry and science majors need to take CHE133/134.

This course is for 3 credits (fully online) and spans 15 weeks plus meets for a 2.5 hour final examination. The course contains extensive written and video content that includes the same information students in a face-to-face lecture course receive, requiring students to engage the online modules for at least three hours per week. Students have significant weekly reading and homework assignments involving critical thinking and quantitative reasoning. Students are tested over the material via quizzes and several exams during the semester including a
comprehensive final exam. These activities average at a minimum 6 hours of work each week to prepare outside of time spent engaging with the content.

**Course Information:**

**Times:** There are no required face-to-face meeting as this course is delivered fully online via D2L, however, please remember that each “Week” starts on Monday morning and ends on Sunday at 11:59pm. All due dates in the syllabus and D2L are based on CDT/CST (Texas) time zones. Late assignments or extensions will not be considered due to difference in time zones.

**Prerequisites:** None, but students should be eligible for MTH 138 and the course must be taken concurrently with CHE 111L: Introductory Chemistry Lab I.

**TEXT AND MATERIALS:**

**Course Materials:**

MC, Chemistry 111 Chemistry 112 for Stephen F Austin State University, SFASU

**To register for CHE-111-500:**

2. Under Register, select **Student**.
3. Confirm you have the information needed, then select **OK! Register now**.
4. Enter your instructor’s course ID: `zamadar02751`, and **Continue**.
5. Enter your existing Pearson account **username** and **password** to **Sign In**.
   You have an account if you have ever used a MyLab or Mastering product.
   If you don’t have an account, select **Create** and complete the required fields.
6. Select an access option.
   » Enter the access code that came with your textbook or that you purchased separately from the bookstore.
   » If available for your course,
      • Buy access using a credit card or PayPal.
      • Get temporary access.
7. From the You're Done! page, select **Go To My Courses**.
8. On the My Courses page, select the course name **CHE-111-500** to start your work.

**To sign in later:**

2. Select Sign In.
3. Enter your Pearson account username and password, and Sign In.
4. Select the course name CHE-111-500 to start your work.

To upgrade temporary access to full access:
2. Select Sign In.
3. Enter your Pearson account username and password, and Sign In.
4. Select Upgrade access for CHE-111-500.
5. Enter an access code or buy access with a credit card or PayPal.

A non-programmable, scientific calculator is required for all exams and quizzes.

To be successful in this course you should do the following:
- Begin the course with positive attitude and desire to learn!
- Get prepared on your first day of the session with your textbook, syllabus, and computer/internet.
- Read the syllabus carefully and mark your calendar for all assignments and deadlines accordingly. Take a note of course policies and other important directions.
- Familiarized yourself of how to use SFA's online D2L system for this course: http://www.sfaonline.info/d2ltutorials
- Check daily course announcements and D2L email for updates in course information, due dates, assignments, changes etc.
- Sign up for D2L notifications. This will allow you to receive messages in your email, as well as in your phone about due dates, announcements, grades, and more: For signing up, log into D2L, and click on the arrow by your profile (upper right-hand corner), and click on Notifications to manage these settings.
- Although, all due dates and assignments will be announced weekly via course announcement on the D2L course page but make sure, you always check due dates and assignments listed in the syllabus in a daily basis.
- Take notes while you are reading chapters and watching/listening to any course materials. A well-organized note always helps to do well in the exams. All materials including videos, homework, as well as quizzes will be considered as materials for the exam.
- Consider of submitting any assignments at least a few hours early and double-check to confirm what you submitted is the correct version in correct format. Please remember that whatever you have submitted by the deadline is what will be graded.
- Do not wait until the last minute to turn in your assignment.
- Do not forget to take a screenshot of all submitted course work and save them and also save all D2L submission receipts of Dropbox assignments.
- Should act as a problem-solver when issues arise (call tech support; use your back-up computer etc.)
I Am Having Trouble in Class. Where Can I Get Help?

- Paying a private tutor is many times NOT what students need if they are having trouble in the class. There are a number of resources that you have already paid for available to you on campus. I strongly recommend that you take advantage of following resources before paying additional money to a private tutor.

Some of these resources are:

- **Your instructor:** Come see me during office hours or email me to make an appointment. I should be your first line of defense. I know what material is being taught, what material will be on exams, and what material you need to know (after all, I am the one who writes the quizzes & exams). You’ve already paid for me when you paid your course tuition. Don’t hesitate to come for help. I want to see you improve and do well. Don’t think that your question is unimportant or that you are wasting my time. I have office hours to help you. That’s why they are there. Even if you are behind, come get help. In addition, take advantage of office hours to build professional relationships with your professors. You never know when you’ll need a recommendation letter from them -- it is a lot easier to write a letter for a student who has done well and we know well.

- You can get one-on-one tutoring at the AARC. Contact the AARC for more specific information on how to get a one-on-one tutor. You need to do this quickly, as only a limited number of slots are available and they fill up rapidly. There is also a Chemistry walk-in table at the AARC. Check with the AARC for more information.

- There will be a SI for this class.

Communication

There are a number of ways for us to communicate in this course:

- **Discussions**—Course discussion forum is designed to answer course-based questions throughout the semester. Please post any general questions about the course, the course content, or learning activities, to this discussion. We will use this forum to make sure we are connecting and that we all understand important course concepts together. I strongly encourage you to answer other students’ questions posted under Course Questions. If everyone is stuck, then your instructor will answer your question for more clarifications.

- **E-mail**—Please e-mail me via D2L by logging into the course and using the email icon to the top right. You can also use my alternative email address (zamadarmr@sfasu.edu) for communications. I will check the e-mail at least once in each weekday (Monday to Friday), and once on the weekend (probably Sunday nights). Please make sure you log on to the course each day and check for e-mails and responses.

- **Office Hours**—If you have any questions about the course materials, your grades, study tips or more related to the course, I strongly ask you to come visit me during my office hours. My office is located in the Chemistry building and room number is 104A. For this semester, my office hours on **M 10.30 am - 12.30 pm, T 10.30 am - 12.30 pm, W 11.30 am - 12.30 pm, and R 10:00 am - 11.00 am**. If I need to reschedule due to some unforeseen reason(s), I will announce in D2L.
Course Syllabus: CHE 111  Introductory Chemistry I  Spring, 2020

- **Appointments:** You may request an office appointment with me, but I must have 24 hours advance notice, and we must mutually agree on an acceptable time.
- **Phone:** You can also contact me by calling at 936.468.2243 during my office hours.

**Grading Policy:**

**Weekly homework** – There will be 8 weekly homework administered via Mastering Chemistry web site. Students are required to get access to the Mastering Chemistry web site. Instructions on how to navigate the Mastering Chemistry web site are provided at the website. A total of 140 points from homework is possible.

**Quizzes** – There will be 9 weekly quizzes administered via D2L. Every quiz will consist of multiple choice questions. Look quizzes under quiz section in D2L. For quiz, only credit will be given for correct answers. Two lowest quiz grades will be dropped. The 7 best quiz grades will be kept. Each quiz is worth 20 points. A total of 140 points from quiz is possible. Please remember quiz will be due in the evening (11:30 pm).

**4-exams (80 pts per test).** There will be 4 non-cumulative, multiple-choice Exams on the materials to our textbook and lectures administered via D2L. Each exam will have 40 questions and will be worth 80 points each. Please check the dates and exam availability in course schedule. Students must have a working computer and internet access and need to log in promptly for taking exam. For any technical help, please call the D2L help line at 936-468-1919. Please remember they are available for assistance from Monday to Friday from 8:00 to 5:00 pm only.

**On Campus Comprehensive Final Exam** – The final exam will be a comprehensive, multiple-choice Exams on the materials to our textbook and lectures. Final exam will have 80 questions and will be worth 200 points. Please check the dates and exam availability in course schedule. Students must have a working computer and internet access and need to log in promptly for taking exam. For any technical help, please call the D2L help line at 936-468-1919. Please remember they are available for assistance from Monday to Friday from 8:00 to 5:00 pm only.

**Missed Exams (Homework or Quizzes):** Technological difficulties, lack of internet or computer access, failing to check D2L reminders and announcements, inability to access or use D2L, misremembering or mishearing exam deadlines will NOT be considered as valid excuses for missing an exam. Make-up exams are very rarely given, and require proper documentation (e.g., note of hospitalization) before the exam deadline has passed (in very rare cases,
notification within 24 hrs of the missed exam may be accepted). It is up to the instructor to determine whether the documentation warrants a make-up exam. If you forget to take an exam, oversleep, or do not have a documented “excuse” for missing an exam, you need to schedule an appointment with me to discuss the matter and your ability to pass the course. In the absence of proper documentation, IF a make-up exam is given (not guaranteed & rarely offered), 30-50% will be deducted from the exam grade. For a proven, excused absence for an exam during the semester, a comprehensive make up exam will be given on Thursday, July 11.

Method of Evaluation: The final grade will be based upon percentage of points obtained in the following:

<table>
<thead>
<tr>
<th>item</th>
<th>point value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Exam I</td>
<td>80</td>
</tr>
<tr>
<td>Exam II</td>
<td>80</td>
</tr>
<tr>
<td>Exam III</td>
<td>80</td>
</tr>
<tr>
<td>Exam IV</td>
<td>80</td>
</tr>
<tr>
<td>Final Exam</td>
<td>200</td>
</tr>
<tr>
<td>Quizzes</td>
<td>140</td>
</tr>
<tr>
<td>homework</td>
<td>140</td>
</tr>
<tr>
<td>TOTAL POINTS</td>
<td>800</td>
</tr>
</tbody>
</table>

Grading scale (Based on total of 750 points possible)
>720 = A; >640 = B; >560 = C; >480 = D; < 480 = F

Attendance Check

Register your Attendance

Go to the Course Tools section and open the Discussion Tool, you will find at the top, 3 attendance checks--one for the first class day, one for the 5th class day, and one for the twelfth class day. Please read and follow the directions for each one, so that you will be counted present for the official class roll.

First class day attendance: Please post your name, where you are from, and how long you have been at SFA as your first class day check in.

Fifth class day attendance: Please post your name and one really cool thing you have learned from previous week’s modules for your fifth class day roll call.
Twelfth class day attendance: Please post your name and your career ambitions and objectives for your twelfth class day attendance.

ACADEMIC INTEGRITY (A-9.1):

Academic integrity is a responsibility of all university faculty and students. Faculty members promote academic integrity in multiple ways including instruction on the components of academic honesty, as well as abiding by university policy on penalties for cheating and plagiarism.

Definition of Academic Dishonesty

Academic dishonesty includes both cheating and plagiarism. Cheating includes but is not limited to (1) using or attempting to use unauthorized materials to aid in achieving a better grade on a component of a class; (2) the falsification or invention of any information, including citations, on an assigned exercise; and/or (3) helping or attempting to help another in an act of cheating or plagiarism. Plagiarism is presenting the words or ideas of another person as if they were your own. Examples of plagiarism are (1) submitting an assignment as if it were one's own work when, in fact, it is at least partly the work of another; (2) submitting a work that has been purchased or otherwise obtained from an Internet source or another source; and (3) incorporating the words or ideas of an author into one's paper without giving the author due credit.

Please read the complete policy at http://www.sfasu.edu/policies/academic_integrity.asp

Any student found cheating will be subject to the penalties as stated in the Student Code of Conduct handbook; including but not limited to a score of zero on exam, expulsion from the class or expulsion from the University.

WITHHELD GRADES SEMESTER GRADES POLICY (A-54):

Ordinarily, at the discretion of the instructor of record and with the approval of the academic chair/director, a grade of WH will be assigned only if the student cannot complete the course work because of unavoidable circumstances. Students must complete the work within one calendar year from the end of the semester in which they receive a WH, or the grade automatically becomes an F. If students register for the same course in future terms the WH will automatically become an F and will be counted as a repeated course for the purpose of computing the grade point average.

The circumstances precipitating the request must have occurred after the last day in which a student could withdraw from a course. Students requesting a WH must be passing the course with a minimum projected grade of C.
STUDENTS WITH DISABILITIES:
To obtain disability related accommodations, alternate formats and/or auxiliary aids, students with disabilities must contact the Office of Disability Services (ODS), Human Services Building, and Room 325, 468-3004 / 468-1004 (TDD) as early as possible in the semester. Once verified, ODS will notify the course instructor and outline the accommodation and/or auxiliary aids to be provided. Failure to request services in a timely manner may delay your accommodations. For additional information, go to http://www.sfasu.edu/disabilityservices/.

CORE OBJECTIVES AND RESOURCES

General Education Core Curriculum Objectives: The Texas Higher Education Coordinating Board has identified six core learning objectives: Critical Thinking Skills, Communication Skills, Empirical and Quantitative Skills, Teamwork, Personal Responsibility, and Social Responsibility. SFA is committed to the improvement of its general education core curriculum by regular assessment of student performance on these six objectives. Although this chemistry course develops the first four core-learning objectives, it only submits assessment assignments to the University Core Assessment Committee every even Spring for the Teamwork general education core curriculum requirement. If this is an even spring semester, another, “shell” course has been created to collect student artifacts to meet this state requirement. You will see this course on your D2L list.

During the even spring semester, you will receive an assignment in the laboratory portion of the course that fulfills both the requirements of the lab and the needs of Stephen F. Austin State University’s Core Curriculum Assessment Plan with the Texas Higher Education Coordinating Board. When you complete this one assignment, you need to upload the assignment to both the Chemistry dropbox and the Teamwork dropbox. Please note that this only applies to the specific teamwork assignment given in the lab section of this course. All other assignments should be submitted according to regular class operations. If you have any questions, please see your instructor or contact the University Assessment Specialist at (936) 468-1267 or jstringfield@sfasu.edu.

Below is a description of each Core Objective, followed by a chart that shows the topics covered in this course with their corresponding core objectives.

Core Objective 1: Critical Thinking: to include creative thinking, innovation, inquiry and analysis, evaluation and synthesis of information.

Definition of CRITICAL THINKING: disciplined thinking that is clear, rational, open-minded, and informed by evidence.

Critical thinking involves the use of a group of interconnected skills. The skills needed can be broken down into six steps.

**Six Steps of CRITICAL THINKING**

1. **Knowledge** means a student must have basic knowledge about the subject.
2. **Comprehension** requires understanding of the subject. Students that comprehend the new knowledge are able to relate the new knowledge to what they already know. Comprehending goes beyond simply parroting material back.
3. **Application** requires both knowledge and comprehension. Students must be able to carry out a task or apply their knowledge and comprehension to an assigned task.
4. **Analysis** involves breaking the knowledge down into smaller parts so it become clear how the smaller parts are related to other ideas.
5. **Synthesis** involves the ability to put together the parts you analyzed with other information to create something original.
6. **Evaluation** occurs once we have understood and analyzed what is said or written and the reasons offered to support it. Then we can appraise this information in order to decide whether you can give or withhold belief, and whether or not to take a particular action.

(accessed May 23, 2013)

---

**Core Objective 2: Communication Skills: to include effective development, interpretation and expression of ideas through written, oral, and visual communication.**

**COMMUNICATION SKILLS in the sciences**

For an excellent resource in scientific communication from a highly reputable source see the information provided on the Nature website link shown below.

[http://www.nature.com/scitable/topic/scientific-communication-14121566](http://www.nature.com/scitable/topic/scientific-communication-14121566)  
( accessed May 31.2013)

Three especially informative links within the link shown above are:

- Effective Communication
- Effective Writing
Core Object 3: Empirical and Quantitative Skills: to include the manipulation and analysis of numerical data or observable facts resulting in informed conclusions.

EMPIRICAL AND QUANTITATIVE SKILLS

Chemists rely on observations to explain the nature of the substances they study. There are two types of observations exist: qualitative and quantitative. A qualitative observation is an observation made with the senses and is usually expressed using words instead of numbers. Qualitative observations about a person sick in the hospital might include that the person is breathing rapidly, has a high temperature, and is very thin.

A quantitative observation is an observation that requires a numerical measurement and describes something in terms of “how much”. The quantitative observation that a person has a temperature of 103.6 °F is much more useful information than just knowing that the person has a fever. Quantitative observations are preferred by scientists. Often quantitative data is acquired in lab.

One or more measurement is always a part of any quantitative observation. A measurement determines the dimensions, capacity, quantity, or extent of something. The most common types of measurements made in chemical laboratories are those of mass, volume, length, temperature, pressure, and concentration. Measurements always consist of two parts: a number, which tells the amount of the quantity measured, and a unit, which tells the nature or kind of quantity measured. A measured number without a unit is meaningless.

Once quantitative data is obtained, chemists then mathematically manipulate and analyze data.

Adapted from saplinglearning.com; accessed May 31, 2013

Core Objective 4: Teamwork: to include the ability to consider different points of view and to work effectively with others to support a shared purpose or goal.

Definition of TEAMWORK: work done by several associates with each doing a part but all subordinating personal prominence to the efficiency of the whole.

TEAMWORK General Rules

Each team member needs:

- all ideas evaluated critically;
- treat others in the group with respect
- everyone needs to pull their weight, meet deadlines, and contribute equally;
- actions need to be followed through;
- reporting needs to be accurate and comprehensive;
- problems with under-performing team members need to be discussed openly and resolved quickly; and
peer assessment should be given fairly

Summary:

<table>
<thead>
<tr>
<th>Core Objective 1: Critical Thinking Skills</th>
<th>To include creative thinking, innovation, inquiry, and analysis, evaluation and synthesis of information.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Core Objective 2: Communication Skills</td>
<td>To include effective development, interpretation and expression of ideas though written, oral, and visual communication.</td>
</tr>
<tr>
<td>Core Objective 3: Empirical and Quantitative Skills</td>
<td>To include the manipulation and analysis of numerical data or observable facts resulting in informed conclusions.</td>
</tr>
<tr>
<td>Core Objective 4: Teamwork</td>
<td>To include the ability to consider different points of view and to work effectively with others to support a shared purpose or goal. <em>This Core Objective is Strongly Emphasized in Lab.</em></td>
</tr>
</tbody>
</table>

Student Learning Outcomes: Upon completion of this course, the students are expected to

- apply chemistry concepts using critical thinking skills and the scientific method to analyze and evaluate information to reach conclusions within problem sets and lab experiments. (COs 1 & 3)
- use communication skills to demonstrate their interpretation and analysis of scientific data. (CO 2)
- apply logic, quantitative reasoning, and pattern recognition to analyze and evaluate numerical data/observable facts to reach conclusions within problem sets and lab experiments. (COs 1 & 3)
- demonstrate the ability to cooperate within groups to gather results of an experiment, analyze data, and draw conclusions using communication skills. (COs 2 & 4)
