Instructor and Class Information

• Instructor: Dr. Brian Beavers, Department of Mathematics and Statistics, Stephen F. Austin State University
  • Office: Math Building 310
  • Email: beaversbd@sfasu.edu
  • Telephone: 936.468.1433
  • Office Hours: 1-2:15pm MTWR, or by appointment

• Instructor: Dr. Josephine Taylor, Department of Biology, Stephen F. Austin State University
  • Office: Math Building 103AA
  • Email: jtaylor@sfasu.edu
  • Telephone: 936.468.2268
  • Office Hours: 1:00-3:00pm TR, 11:00am-12:00pm F, or by appointment

Class Meeting Information

Class Meetings and Location: 2:30-3:45pm MW in Bush Mathematical Sciences Building Room 123 (not 205 as in the official class schedule).

Course Expectations:

The following is an excerpt from SFA Policy 5.4:

_The federal definition of a credit hour is an amount of work represented in intended learning outcomes and verified by evidence of student achievement that is an institutionally established equivalency that reasonably approximates:_

1. _Not less than one hour of classroom or direct faculty instruction and a minimum of two hours out-of-class student work each week for approximately fifteen weeks for one semester or trimester hour of credit, or 10 to 12 weeks for one quarter hour of credit, or the equivalent amount of work over a different amount of time, or;_
2. At least an equivalent amount of work as outlined in item 1 above for other academic activities as established by the institution including laboratory work, internships, practica, studio work, and other academic work leading to the award of credit hours.

To this end, all students in courses offered by Stephen F. Austin State University who wish to be successful should plan to spend a minimum of three hours of work for every credit hour associated with this course.

Expected activities to be completed in the time include reviewing course content, reading assigned course resources, completing all assigned exercises and projects, and performing periodic assessment preparation. Students should check daily for course announcements.

**Required Materials**

- Two books for assigned readings:
- Functional computer and internet connectivity, preferably high-speed
- Microsoft Office 365 (provided by SFA) and Microsoft Teams (free)

**About This Course**

**Prerequisites:** JTCH 1102 (Step 2: Inquiry-Based Lesson Design)

**Course Topics:**

Please see the calendar in D2L for our course topics, assigned readings, and deadlines. This is a tentative list of topics that may change once we get going.

- Course Orientation
- What is Science? What is Mathematics?
- Plato's Philosophy of Mathematics
- Revolutions in Astronomy
- Paradoxes of Division
- Minus Times Minus is What?
- Radical Puzzles
- Species, Monsters, and Things in Between
- Darwin's Path to Evolution
- Questions and Evidence on Evolution
• Secrets of the Alchemists
• Impossible Chemistry
• Discovery of the Electron
• Infinitely Small
• Prisoners of Probability
• The Age of the Earth
• Non-Euclidean Geometry
• Philosophies of Math: Choose or Sleepwalk?
• Sir Isaac Newton
• Albert Einstein

Course Description: This upper-division history course explores a selection of topics and episodes in the history of science and mathematics. The specific objectives and expectations in the table following this section are part of four broad, interlocking goals:

• to provide you with an overview of the history of science and mathematics;
• to enable you to put these historical perspectives and context to work in pedagogy;
• to promote intellectual curiosity and sharpen your critical thinking skills; and
• to improve your presentation and writing skills.

As a key component of this course, you will design and prepare two 5E Lesson Plans of at least 2,000 words each. You will select the subject of these lesson plans from a variety of options. (Detailed instructions will be distributed separately.) Once graded, you will incorporate corrections into your lesson plan and electronically post the revised product for an opportunity to improve your grade. Additionally, you will give a formal presentation of lesson plans to a group of peers and participate in critiquing presentations of others.

The course includes a midterm exam designed to test the extent to which you have followed, engaged, and learned from the topics discussed in class as well as from assigned readings. As a final exam you will have a 30-minute oral exam where you answer some questions about what you have learned over the whole semester.

The assigned readings for this course vary in length and you are encouraged to read thoughtfully in all cases. Lightly skimming the material will not adequately prepare you for the level of critical thinking and engagement you are expected to display in class discussions. Some of the readings are from primary sources (such as writings by prominent scientists), other readings are from secondary texts (such as by historians). You are also required to do additional research and reading to inform your lesson plans. (Keep this in mind when budgeting your time for this course). Each week you will write and turn in a short reflection paper on topics related to the material covered - presenting your understanding of the issues raised and how knowing about this issue will affect your classroom practice.

Classes are conducted as a mixture of lecture and discussion. Accordingly, attendance and participation are important, as you can see from the grading distributions below. Attendance will be taken daily, and will be used in evaluating your overall grade for class participation.
You are encouraged to ask questions at any time during lectures, as well as to speak up and offer thoughts, ideas, and opinions during class discussions.

**Course Objectives:**

<table>
<thead>
<tr>
<th>Students will...</th>
<th>Evidence</th>
</tr>

A complete listing of all the educator preparation standards this course meets and a list of the key assessments used for program accreditation purposes can be found at: https://sfasu.edu/docs/jacksteach/jacksteach-standards-alignment-chart.xlsx
Expectations:

1. Everyone is expected to attend class. You have one free absence without consequences. After that you must provide written medical proof of illness, or another acceptable exemption, otherwise, you will lose .5 percentage points for each absence.
2. Work turned in late without an extension approved by the instructors will be penalized 50%. If you are unable to meet a deadline for a major grade component, you are expected to contact one of the instructors at least 24 hours before the deadline, or the 50% penalty may apply.
3. One of the goals of this course is to give you a chance to improve your skill in writing about technical material. You may (and likely will) be given opportunity to revise writing that does not meet standards and expectations. Our expectation of writing quality will likely rise as your skill improves through the semester.
4. University policies on plagiarism and academic dishonesty will be enforced in this class. In addition to the policy statement at the end of this syllabus, a helpful website on avoiding plagiarism in history courses is: https://liberalarts.utexas.edu/history/about/academic-integrity.php
5. Readings will either be in one of the two required texts for the class, be posted in Brightspace, available online (from reliable sources), or handed out in class (if they are from outdated original sources). All readings will be announced on a weekly basis; if for whatever reason you miss a day of class, you are responsible for obtaining the assignment.

Assignments and Grading Policy

90 to 100 = A

80 to 89 = B

75 to 79 = C

70 to 74 = D

below 70 = F

The SFA Way

"...striving for personal excellence in everything that we do."

At Stephen F. Austin State University, our faculty, staff, alumni and students believe in doing things "The SFA Way." We expect the best from ourselves and from each other, and we hold each other accountable when we fail to maintain these standards.

Root Principles

Grounded in the five "Root Principles" below, members of the SFASU community seek to strive for personal excellence in everything that we do.

The Principle of Respect:

Lumberjacks command respect and treat others with respect • They are considerate of others and tolerant of differences • They demonstrate respect for those around them by avoiding the use of offensive or profane language • They do not threaten or harm anyone and deal peacefully and civilly with conflict.

The Principle of Caring:

Lumberjacks think of the needs of others and seek to improve the quality of life of those around them • They are compassionate, empathic and kind • They respond with humility to those they have helped and express gratitude freely to those who help them • Lumberjacks prepare themselves to become leaders in their communities and workplaces • They dedicate themselves to excellence in their chosen field of study and to using what they learn in the service of others.

The Principle of Responsibility:

Lumberjacks do what is right • They persevere in times of adversity • Through self-control and self-discipline, they strive to do their best • Lumberjacks challenge each other to exceed
expectations • They are active learners both inside and outside of the classroom • They are reliable; they do what they say they will do • Lumberjacks hold themselves accountable for their decisions •

The Principle of Unity:

Lumberjacks are loyal to their friends, family, university, state and country • Lumberjacks stand together against any adversary • They recognize that though we are very different from one another, we are united by the Lumberjack Spirit. Lumberjacks seek to understand the people and world around them • When one lumberjack fails, all fail • When one lumberjack succeeds, all succeed.

The Principle of Integrity:

Lumberjacks have the courage to do what is right, even when it is hard or unpopular • They respond to each situation with steadfast values that are not subject to change based on the actions of others • They seek opportunities to practice effective and ethical leadership • Lumberjacks are honest; they do not deceive, cheat or steal • Lumberjacks stand up for those who cannot stand up for themselves • As lifelong learners, lumberjacks are committed to continuously improving themselves.

Academic Integrity (4.1)

Academic integrity is a responsibility of all university faculty and students. Faculty members promote academic integrity in multiple ways including instruction on the components of academic honesty, as well as abiding by university policy on penalties for cheating and plagiarism.

Definition of Academic Dishonesty

Academic dishonesty includes both cheating and plagiarism. Cheating includes but is not limited to

1. using or attempting to use unauthorized materials to aid in achieving a better grade on a component of a class;
2. the falsification or invention of any information, including citations, on an assigned exercise; and/or
3. helping or attempting to help another in an act of cheating or plagiarism.

Plagiarism is presenting the words or ideas of another person as if they were your own. Examples of plagiarism are
1. submitting an assignment as if it were one's own work when, in fact, it is at least partly the work of another;
2. submitting a work that has been purchased or otherwise obtained from an Internet source or another source; and
3. incorporating the words or ideas of an author into one's paper without giving the author due credit.

Please read the complete policy at http://www.sfasu.edu/policies/student-academic-dishonesty-4.1.pdf

Withheld Grades (5.5)

Ordinarily, at the discretion of the instructor of record and with the approval of the academic chair/director, a grade of WH will be assigned only if the student cannot complete the course work because of unavoidable circumstances. Students must complete the work within one calendar year from the end of the semester in which they receive a WH, or the grade automatically becomes an F. If students register for the same course in future terms the WH will automatically become an F and will be counted as a repeated course for the purpose of computing the grade point average.

The circumstances precipitating the request must have occurred after the last day in which a student could withdraw from a course. Students requesting a WH must be passing the course with a minimum projected grade of C.

Students with Disabilities

To obtain disability related accommodations, alternate formats and/or auxiliary aids, students with disabilities must contact the Office of Disability Services (ODS), Human Services Building, and Room 325, 468-3004 / 468-1004 (TDD) as early as possible in the semester. Once verified, ODS will notify the course instructor and outline the accommodation and/or auxiliary aids to be provided. Failure to request services in a timely manner may delay your accommodations. For additional information, go to http://www.sfasu.edu/disabilityservices/.

Acceptable Student Behavior
Classroom behavior should not interfere with the instructor’s ability to conduct the class or the ability of other students to learn from the instructional program (see the Student Conduct Code, policy D-34.1). Unacceptable or disruptive behavior will not be tolerated. Students who disrupt the learning environment may be asked to leave class and may be subject to judicial, academic or other penalties. This prohibition applies to all instructional forums, including electronic, classroom, labs, discussion groups, field trips, etc. The instructor shall have full discretion over what behavior is appropriate/inappropriate in the classroom. Students who do not attend class regularly or who perform poorly on class projects/exams may be referred to the Early Alert Program. This program provides students with recommendations for resources or other assistance that is available to help SFA students succeed.
