Meeting Location: 3rd floor of Chemistry Building

Class Times:
- Blevins Wednesday 11-2
- Akinrinmade Wednesday 11-2
- Asefaw Tuesday 11:30-2:30
- Williams Tuesday 11:30-2:30

Class Times:

Department: Chemistry & Biochemistry

Departmental Phone: 936 468 3606

Email: frydr@sfasu.edu

Office: M-120

Office Hours: MWF 9-10:30 and by appointment.

Phone: (936) 208—3415 (text)

Catalog Description: One to four semester hours. May be repeated for a total of four hours credit. Undergraduates only. Individual study and/or laboratory research. Prerequisite: Consent of the instructor. Pass-Fail grading.

Prerequisites: Permission of instructor

Required Texts and Other Materials:
- Lab notebook (see me for guidelines)
- A USB “thumb drive” for data storage & transfer
- Approved safety glasses or safety goggles

Required Supplementary Reading: Handouts and journal articles will be provided as needed.

Student Learning Outcomes: Upon completion of the course, students will be able to:

- apply the chemistry knowledge obtained during the college career.
- analyze experimental results based upon trends in data.
- practice the safe use/handling of chemicals and their proper storage

Course Requirements:

You will work in the lab ~3 hours per day for each hour of credit that you are enrolled. Before August 31, we will decide on a mutually-agreeable time for you to come to lab and work. We will also meet individually to discuss your results and plan what is to be done next in the lab. You must also submit a Formal Research Report (FRR) of your lab work and results for the semester. The FRR must be submitted to me by email no later than 12:00 noon on Monday, after finals. Failure to turn in an FRR on time will result in a grade of F for this course. Details related to this paper are provided below. In addition, you should also provide me with carbon copies of your lab notebook pages.

Attendance Policy:
If you cannot make it to work at your scheduled time, please let me know. We can arrange a mutually convenient time to “make-up” the lab work.

You must attend 8 times during the semester. Failure to attend and work during the agreed upon time will result in a F for the course.

Academic Integrity Policy:

All students are urged to acquaint themselves with the University’s codes, policies, and procedures involving academic misconduct, grievances, sexual and ethnic harassment, and discrimination based on disability. Copies of the SFA Policies and Procedures Manual can be obtained in print or online from the Office of Academic Affairs (http://www.sfasu.edu/upp/pap/academic_affairs.html).

Semester Withdrawals:

Please note: The last day to drop this course without receiving a WP or WF on your transcript is Monday, Nov. 29th.

Academic Disabilities Policy:
Stephen F. Austin State University is committed to providing reasonable accommodations for all students with disabilities. Students with disabilities who require accommodations in this course are requested to speak with me as early in the semester as possible. Students with disabilities must be registered with the Office of Disability Services prior to receiving accommodations in this course. The Office of Disability Services is located in the Human Services Bldg., Room 325, (936) 468-3004 or (936) 468-1004 (TDD).

I reserve the right to change any items contained in this syllabus. This includes, but is not limited to: course content, scheduled dates, grade cutoffs, and fraction(s) of final grade assigned to individual components of the course. If I need to make such changes, I will inform you of the changes in writing. This syllabus in no way constitutes a legally-binding contract on my part.

In addition, to help organize and plan your research and to track your progress, you will be required to submit the following items. **Please pay careful attention to the due dates.**

**Formal Research Report (FRR):** (Due to me by 12:00 Monday after finals)

The FRR is a means for you to improve your scientific writing through multiple feedback/editing/revision cycles throughout your undergraduate career. The proposal that you completed at the beginning of research will serve as a basis for the FRR. As you progress and collect more data, you will add these to your FRR. The FRR will be a “living document” that will be revised and improved during your research work. The FRR, and the results contained therein, will ultimately form the bulk of the Capstone paper that is part of the curriculum requirements for Senior Seminar (CHE 4170). The FRR must consist of the following sections, in the order listed:

- Title
- Abstract
- Introduction & background
- Methodology
- Results
- Discussion
- Conclusions & Future Work
- References (all references must be provided in ACS format)

**Lab Notebook:**

- You will use and maintain a notebook on your research (including library and literature work) during the course of the semester.
- **You MUST bring your notebook (phone) to lab ANYTIME you come to the lab to work.**
- If you don’t have your notebook, you are not ready for lab and will be sent home to get your notebook.
- Check with me (before buying anything) to find out what constitutes an acceptable lab notebook.
- All notebook records are to be kept in black ink.
- Keep meticulous experimental details in your lab notebook.
- Make sure you date everything clearly in your lab notebook.
- Your notebook should be neat, legible, and easy-to-follow.
- Bring your notebook and any other data (e.g. spectra, etc.) you have collected when you come to meet with me to discuss your progress.
- Please provide me both hard copies & electronic copies of any spectra (IR or NMR) that you have collected over the semester.

**General Policies:**
You are expected to come ready to work in the lab at the times you have agreed to work. If you are not able to come, please contact me (phone or email) and let me know that you won’t be in. We will discuss making up the missed time if the need should arise.

You should come and check in with me before beginning lab work. Please don’t carry out lab work while I am not around (this is for your safety).

You are expected to follow all departmental safety rules while working in the lab.
  - Specifically, you are expected to wear approved safety goggles, proper shoes, and long trousers while in lab.

You will be assigned a drawer in the lab for you to store your lab notebook and other personal items.

All glassware and equipment in the lab is communal. Be courteous to your fellow labmates. If you need something, use it. After you are done, clean it up and return it to its proper place.

I expect you to use departmental equipment responsibly. You will not be allowed to use departmental instruments on your own until you have been suitably trained (by me) and I feel confident that you are able to use the instrument safely. Please see me if you are unsure of how to perform a particular procedure or how to use equipment.

(Fry used Franks syllabus and modified it with Fry’s information.)
Mental Health and Wellness:
SFA values students' mental health and the role it plays in academic and overall student success. SFA provides a variety of resources to support students' mental health and wellness. Many of these resources are free, and all of them are confidential.
