Signals and Systems
ENGR 4353

Name: Hector A Ochoa
Email: ochoah@sfasu.edu
Phone: 936-468-2896
Office: STEM 207E
Office Hours: https://calendly.com/ochoa-hector-a/office-hours (4 hours in advance)
Department: Department of Physics, Engineering and Astronomy
Class meeting time and place: Lecture: TR 12:30 – 1:45 pm / STEM 108; Laboratory: M 1:00 – 3:50 pm / STEM 108

Course Description:
This course includes types of signals and systems, properties of systems, convolution, Fourier series, Fourier transforms, Laplace transforms, difference equations, Z-transform, discrete-time systems, applications and design concepts. Prerequisite: ENGR 2305.

Text and Materials:

Assignments:
There will be assignments almost every week. These assignments are due one week after they have been posted. Assignments will be submitted using D2L Dropbox. Keep in mind that the HW should be clean and organized.

Projects
We will have a few projects during the semester. These will be released in D2L, and the results will need to be submitted as a formal report. A laboratory report template will be provided.

Assignment Quizzes:
Assignment quizzes will be posted on D2L. These are designed to gauge the level of understanding of the concepts covered at that point in time. These quizzes are typically released after the homework has been submitted.

Exams:
During the semester, we will be having two regular exams. These will be based on the concepts covered in the lecture and homework. I will inform you in advance when it is time to take an exam.

Final Exam
The final exam will be given during finals week. This exam is comprehensive, but a great percentage of the exam will be based on the concepts covered in chapters: 7, 9 and 10. Once we get close to the end of the semester, I will discuss the final exam with you.

Grading Policy:

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>

</tr>
<tr>
<td>More than 12 hours, less than 24</td>
<td>20</td>
</tr>
<tr>
<td>More than 24 hours, less than 48</td>
<td>50</td>
</tr>
<tr>
<td>More than 48 hours</td>
<td>100</td>
</tr>
</tbody>
</table>

Credit Hour Justification
Meets 3 hrs/wk for 15 weeks, and also meets for a 2-hour final examination. This is a problem oriented class with homework problems. The lecture total 2.5 hours of contact time each week and the work outside of classes each week averages much more than 5 hours in working homework problems, preparing and answering online quizzes, reading the book to understand the theories used in lecture and in homework problems and exams, working on projects, writing formal project reports, and studying for exams which include major exams and possibly short lecture quizzes.
Student Learning Outcomes
By the end of the course, a successful student will be able to:
1. Model linear systems and composite signals. (SO – 1)
2. Model systems using time domain techniques.
3. Apply the Fourier Series to signals. (SO – 1)
4. Apply the Fourier Transform to signals. (SO – 1)
5. Use the Laplace Transform to model systems. (SO – 1)
6. Understand the application of the Laplace Transform. (SO – 1)
7. Analyze Discrete Time signals and systems. (SO – 1)
8. Simulate signals and systems in MATLAB. (SO – 6)
9. Write effective reports. (SO – 3)

Program Learning Outcomes
Graduates of the program will:
1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgements, which must consider the impact of engineering solutions in global, economic, environmental, and social contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies

General Education Core Curriculum Objectives/Outcomes (EEO)
There are no specific general education core curriculum objectives in this course. This course is not a general education core curriculum course.

Academic Integrity (A-9.1)
Academic integrity is the responsibility of all university faculty and students. Faculty members promote academic integrity in multiple ways, including instruction on the components of academic honesty and abiding by university policy on penalties for cheating and plagiarism.

Definition of Academic Dishonesty
Academic dishonesty includes both cheating and plagiarism. Cheating includes but is not limited to (1) using or attempting to use unauthorized materials to aid in achieving a better grade on a component of a class; (2) the falsification or invention of any information, including citations, on an assigned exercise; and/or (3) helping or attempting to help another in an act of cheating or plagiarism. Plagiarism is presenting the words or ideas of another person as if they were your own. Examples of plagiarism are: (1)
submitting an assignment as if it were one's own work when, in fact, it is at least partly the work of another; (2) submitting a work that has been purchased or otherwise obtained from an Internet source or another source; and (3) incorporating the words or ideas of an author into one's paper without giving the author due credit. Please read the complete policy at [http://www.sfasu.edu/policies/student-academic-dishonesty-4.1.pdf](http://www.sfasu.edu/policies/student-academic-dishonesty-4.1.pdf).

**Withheld Grades Semester Grades Policy (A-54)**
Ordinarily, at the discretion of the instructor of record and with the approval of the academic chair/director, a grade of WH will be assigned only if the student cannot complete the coursework because of unavoidable circumstances. Students must complete the work within one calendar year from the end of the semester in which they receive a WH, or the grade automatically becomes an F. If students register for the same course in future terms the WH will automatically become an F and will be counted as a repeated course to compute the grade point average. For additional information, go to [https://www.sfasu.edu/policies/course-grades-5.5.pdf](https://www.sfasu.edu/policies/course-grades-5.5.pdf).

**Students with Disabilities**
To obtain disability-related accommodations, alternate formats, and/or auxiliary aids, students with disabilities must contact the Office of Disability Services (ODS), Human Services Building, and Room 325, 468-3004 / 468-1004 (TDD) as early as possible in the semester. Once verified, ODS will notify the course instructor and outline the accommodation and/or auxiliary aids to be provided. Failure to request services promptly may delay your accommodations. For additional information, go to [http://www.sfasu.edu/disabilityservices/](http://www.sfasu.edu/disabilityservices/).

**Student Wellness and Well-Being**
SFA values students’ overall well-being, mental health and the role it plays in academic and overall student success. Students may experience stressors that can impact both their academic experience and their personal well-being. These may include academic pressure and challenges associated with relationships, emotional well-being, alcohol and other drugs, identities, finances, etc. If you are experiencing concerns, seeking help, SFA provides a variety of resources to support students’ mental health and wellness. Many of these resources are free, and all of them are confidential.

*On-campus Resources:*
The Dean of Students Office (Rusk Building, 3rd floor lobby) [www.sfasu.edu/deanofstudents](http://www.sfasu.edu/deanofstudents)
936.468.7249 dos@sfasu.edu

**SFASU Human Services Counseling Clinic**
Human Services, Room 202 [www.sfasu.edu/humanservices/139.asp](http://www.sfasu.edu/humanservices/139.asp) 936.468.1041

**The Health and Wellness Hub**
“The Hub” Location: corner of E. College and Raguet St. To support the health and well-being of every Lumberjack, the Health and Wellness Hub offers comprehensive services that treat the whole person – mind, body and spirit. Services include:
- Health Services
- Counseling Services
- Student Outreach and Support
- Food Pantry
- Wellness Coaching
- Alcohol and Other Drug Education
