ECO 2301.503 Principles of Macroeconomics
Spring 2024, Fully Online Course

Instructor: Dr. Mark Scanlan
E-mail: scanlanm@sfasu.edu
Office Phone: 1883
Nelson Rusche College of Business
Department: Economics & Finance
Office Phone: 1883
Office Location: 303H
Office Location: 303H
Web Sites: https://d2l.sfasu.edu/ and http://faculty.sfasu.edu/scanlanm/

Office Hours: Online office hours will be on Tuesdays from 1:15 – 3:00 pm.
https://sfasu.zoom.us/j/95687087359?pwd=WkNNb1pmNjNZNlILRm1WQU1nQ2Urdz09
Meeting ID: 956 8708 7359
Passcode: 763354

I check email and messages frequently so feel free to contact me anytime. I am also happy to set
up an appointment to meet in my office anytime.

Course Description:
This course is an introduction to the behavioral science of economics which focuses on the
aggregate behavior of households, firms and the government. Topics covered include gross
domestic product, national income, economic growth, unemployment, inflation, the business
cycle, fiscal policy and monetary policy, and international trade.

Text: Greg Mankiw; Principles of Economics 9th Ed, South-Western. The online homework tool
Mindtap/Aplia is also required for this course (explained in detail later).

Grading:
The course grade will be based on:
1. Ten pre-class quizzes worth 2 points each (3% of your overall grade)
2. Ten mini quizzes on D2L worth 4 points each (7% of your overall grade),
3. Two Review Quizzes worth 50 points each (18% of your overall grade),
4. Ten Aplia assignments worth 10 points each (18% of your overall grade),
5. A Midterm and Final Exam worth 150 points each (54% of your overall grade).
This gives a total of 560 available points in the class.

Points needed to earn each letter grade
A: At least 504 points
B: At least 448 points.
C: At least 392 points.
D: At least 336 points.
F: Below 336 points.

Review Quizzes:
Review Quiz #1: Friday Feb 9th
Review Quiz #2: Friday April 12th

Midterm Exam: (Proctored)
Friday March 8th – Due by midnight
Final Exam: (Proctored)
May 7th – 8th
**Review Quizzes:** These mini exams are intended to allow students to evaluate their progress in understanding course material while also providing a preview of the midterm and final exams. These 50-minute quizzes can be taken any time on the day that they are opened, but must be completed by midnight at the latest. Unlike the midterm and final exams, Review Quizzes are open-book and and open-note exams.

**Midterm and Final Exams:** Both the midterm and final are 75-minute proctored exams that are closed-book and closed-notes. Students are allowed a 1-page (8.5”x11”) “cheat-sheet” with writing on one side only. The sheet must be handwritten with standard size writing. “Cheat-sheets” with unusually small writing are not allowed and will be considered cheating on the exam. The midterm covers all material in modules 1 through 7, while the final exam covers all material in modules 8 through 13.

Since these exams are proctored students need access to a quiet location to take the exams along with a webcam with audio and video capabilities. At the start of the exam students must show the front and back of their “cheat-sheets” along with their immediate work area. Students must also remain quiet during the exam to avoid any flags for cheating, so questions cannot be read out loud during the test.

**Pre-Class Quizzes:** There will be ten pre-class quizzes worth 2 points each that are required throughout the semester. These are general knowledge questions that are answered after reading the chapter in the text. The questions are found in the online homework tool Aplia/Mindtap described below. The exact due dates for each pre-class quiz are listed in the Timeline.

**D2L Assignments:** A total of 13 D2L mini quizzes/assignments will be given during the semester, with only 10 counting towards your grade. These assignments are worth 4 points each and have deadlines listed in the calendar below. Most of these assignments allow unlimited attempts, with only the highest score counting towards your grade. There are exceptions to this however, so check attempts allowed on the quiz before starting.

**Deadlines:** Deadlines for all assignments in the class are firm and final. These deadlines are listed in the schedule below and are not extended for any reason. To account for illnesses/power outages/deaths in the family I drop your 3 lowest scores for both D2L and Aplia assignments. These drops happen automatically, and you are not required to provide any documentation as to why you missed an assignment. The assignments are opened very early so be sure to complete them well before the due date to avoid any conflicts. If you do miss an exam due to a university excused absence, please let me know and we can reschedule those.

**Work Together:** I strongly encourage students to work together on homework, and when studying for exams. If you would like support in finding others to study with, please let me know so I can try to help. Remember that all work turned in for points must be your own and the use of artificial intelligence is not allowed, but working with others to learn class material and complete assignments is encouraged.
Details on Online Homework Tool Aplia/Mindtap

The online homework tool called Aplia/Mindtap is required for this course. It is almost impossible to pass the course without having access to this tool. The good news is that when you pay for Aplia you also get free access to the e-book for this course. If you took ECO2302 last semester and used Aplia you will be able to use it again for this course for free, just use your same log-in information. Below are some very important points regarding Aplia, read each one carefully.

1. **Access:** You must only access Aplia through the links I provide in D2L. If you try to access it from the Cengage website directly it may lock you out of the course. Don’t ask me why this happens, it is annoying so let’s just try to avoid this problem.

2. **Free Trial:** There is a free trial of Aplia for roughly the first two weeks of class so sign up right away. Also, try to pay for it as soon as possible since occasionally there are issues with the payment link.

3. **Homework Assignments:** A total of 13 Aplia assignments will be given with 10 counting toward your grade. This means your 3 lowest Aplia scores will be dropped.

4. **Attempts:** The Aplia assignments will allow you to have 3 attempts at each assignment with the average of these attempts counting toward your grade. we will use “Do No Harm Grading” which means your average cannot be pulled down by poor scores on your 2nd or 3rd attempts, it can only be pulled upward by higher scores.

5. **Deadlines:** The due date for each assignment is listed on the Timeline for the course. These assignments are due by midnight on these dates, however, be sure to start your assignments far in advance. Deadlines will not be moved or extended for any reason (this includes power outages, illnesses, the Aplia website crashing,…) Starting the assignment early gives you time to troubleshoot any problems that may arise. I also drop your 3 lowest Aplia assignments in case you do get sick, have internet issues, or just forget an assignment.

6. **Technical issues** – I cannot resolve any technical issues with Aplia, if you run into a problem, you can check the FAQ at the bottom of the discussion forum on D2L or contact Aplia tech support. You can email them or call 866-994-2427. If they are slow to respond to you let me know and I can nudge them.

General Education Core Curriculum
The Texas Higher Education Coordinating Board has identified six core learning objectives: Critical Thinking Skills, Communication Skills, Empirical and Quantitative Skills, Teamwork, Personal Responsibility, and Social Responsibility. SFA is committed to the improvement of its general education core curriculum by regular assessment of student performance on these six objectives. By enrolling in ECON 2301 you are also enrolling in a Core Curriculum Course that fulfills the Social/Behavioral Science requirement. The chart below indicates: (a) the core objectives that are required to be taught in this course per the Texas Higher Education Coordinating Board (THECB), (b) how the required core objectives will be addressed.

Core Curriculum Objective Table

<table>
<thead>
<tr>
<th>Core Objective</th>
<th>Definition</th>
<th>How the Core Objective Will be Addressed</th>
</tr>
</thead>
<tbody>
<tr>
<td>Critical Thinking Skills (C)</td>
<td>To include creative thinking, innovation, inquiry, and analysis, evaluation and synthesis of information.</td>
<td>Students are taught the underlying assumptions of economic models and how to apply the models in various scenarios. These skills are taught through lecture, assigned readings, and an interactive homework regime. Critical thinking skills are developed through in-class examples. As one example, students are assigned problems testing their ability to predict changes in national production and inflation that result from monetary and fiscal interventions.</td>
</tr>
<tr>
<td>Communication Skills (V)</td>
<td>To include effective development, interpretation and expression of ideas though written, oral, and visual communication.</td>
<td>A significant component of the course is not only the development of an economic vocabulary and ability to communicate using economic terminology, but also the ability to communicate using visual representations of various economic models. These include (but are not limited to) the production possibilities frontier, the supply and demand model, the production function, and the aggregate supply and aggregate demand model. Students develop and demonstrate their communication skills by interacting with other students and faculty in class, and by communicating their understanding of the economic concepts (with a focus on the use and interpretation of graphs).</td>
</tr>
<tr>
<td>Empirical and Quantitative Skills (E)</td>
<td>To include the manipulation and analysis of numerical data or observable facts resulting in informed conclusions.</td>
<td>Instructors use class time, assigned readings and an interactive homework regime to teach basic empirical and quantitative skills such as the application of graphing and models, the application of marginal analysis, the accounting of national income, inflation adjustments and the application of the growth rate formula toward real gross income.</td>
</tr>
</tbody>
</table>
Instructors not only spend time developing these skills, they also focus on how these skills can lead to a better understanding of the real world and in making well-informed and logical decisions.

| Social Responsibility (S) | To include intercultural competence, knowledge of civic responsibility, and the ability to engage effectively in regional, national, and global communities. | Basic economic literacy helps students to be better informed participants in important discussions about how resources are allocated in a society. Class lectures, readings and an interactive homework regime focus on several issues with regard to social responsibility including: the link between national production and the standard of living, the relevance of international trade to global production and the tradeoff between an efficient and equal allocation of resources. Students are shown how to apply the appropriate economic model to study the particular economic question at hand, and how to apply these economic concepts to the world around them. |

**Program Learning Outcomes:**
Program learning outcomes define the knowledge, skills, and abilities students are expected to demonstrate upon completion of an academic program. These learning outcomes are regularly assessed to determine student learning and to evaluate overall program effectiveness. You may access the program learning outcomes for your major and particular courses in the Curriculum Management Handbook at [http://www.sfasu.edu/academics/colleges/business/welcome/faculty-resources](http://www.sfasu.edu/academics/colleges/business/welcome/faculty-resources).

**Student Learning Outcomes:**
Upon successful completion of the course, the student should be able to demonstrate a basic understanding of:
- News relating to the economy as a whole as reported in such publications as The Wall Street Journal (C, S)
- The economic implications of changes in government fiscal or monetary policy (C, V, E, S)
- How interest rates are determined (C, V, E)
- The role of interest rates in personal and corporate decision-making (C, V, E, S)
- Critically apply economic concepts when participating as a citizen in a democratic society (C, S)

**Academic Integrity**
The Code of Student Conduct and Academic Integrity outlines the prohibited conduct by any student enrolled in a course at SFA. It is the responsibility of all members of all faculty, staff, and students to adhere to and uphold this policy.

Articles IV, VI, and VII of the new Code of Student Conduct and Academic Integrity outline the violations and procedures concerning academic conduct, including cheating, plagiarism, collusion, and misrepresentation. Cheating includes, but is not limited to: (1) Copying from the test paper (or other assignment) of another student, (2) Possession and/or use during a test of materials that are not authorized by the person giving the test, (3) Using, obtaining, or attempting to obtain by any means the whole or any part of a non-administered test, test key, homework solution, or computer program, or using a test that has been administered in prior classes or semesters without permission of the Faculty member, (4) Substituting for another person, or permitting another person to substitute for one’s self, to take a test, (5) Falsifying research data, laboratory reports, and/or other records or academic work offered for credit, (6) Using any sort of unauthorized resources or technology in completion of educational activities.
Plagiarism is the appropriation of material that is attributable in whole or in part to another source or the use of one’s own previous work in another context without citing that it was used previously, without any indication of the original source, including words, ideas, illustrations, structure, computer code, and other expression or media, and presenting that material as one’s own academic work being offered for credit or in conjunction with a program course or degree requirements.

Collusion is the unauthorized collaboration with another person in preparing academic assignments offered for credit or collaboration with another person to commit a violation of any provision of the rules on academic dishonesty, including disclosing and/or distributing the contents of an exam.

Misrepresentation is providing false grades or résumés; providing false or misleading information in an effort to receive a postponement or an extension on a test, quiz, or other assignment for the purpose of obtaining an academic or financial benefit for oneself or another individual or to injure another student academically or financially.

Withheld Grades Semester Grades Policy (5.5)
Ordinarily, at the discretion of the instructor of record and with the approval of the academic chair/director, a grade of WH will be assigned only if the student cannot complete the coursework because of unavoidable circumstances. Students must complete the work within one calendar year from the end of the semester in which they receive a WH, or the grade automatically becomes an F. If students register for the same course in future terms the WH will automatically become an F and will be counted as a repeated course to compute the grade point average. For additional information, go to https://www.sfasu.edu/policies/course-grades-5.5.pdf.

Students with Disabilities
To obtain disability-related accommodations, alternate formats, and/or auxiliary aids, students with disabilities must contact the Office of Disability Services (ODS), Human Services Building, and Room 325, 468-3004 / 468-1004 (TDD) as early as possible in the semester. Once verified, ODS will notify the course instructor and outline the accommodation and/or auxiliary aids to be provided. Failure to request services promptly may delay your accommodations. For additional information, go to http://www.sfasu.edu/disabilityservices/.

Student Wellness and Well-Being
SFA values students’ overall well-being, mental health and the role it plays in academic and overall student success. Students may experience stressors that can impact both their academic experience and their personal well-being. These may include academic pressure and challenges associated with relationships, emotional well-being, alcohol and other drugs, identities, finances, etc.

If you are experiencing concerns, seeking help, SFA provides a variety of resources to support students’ mental health and wellness. Many of these resources are free, and all of them are confidential.
