Class Syllabus/Policy  
MATH 3370 section 1: College Geometry, Spring 2024

Name: Clint Richardson  
Email: crichardson@sfasu.edu  
Phone: Office—936-468-1736  
Office: Bush Mathematical Sciences Building, room 306  
Office Hours: MTWRF 10–10:50, W 1:30–2:30 or by appointment  
Department: Mathematics and Statistics  
Class meeting time/place: TR 11–12:15, Bush Math 208

This form contains course information specific to this section; information common to all sections—including course description, the various applicable objectives/learning outcomes, course calendar/outline, and applicable SFA policies can be found at https://math.sfasu.edu/docs/syllabi/MATH3370Syllabus.pdf.

Text and Materials: Course materials will be provided.

Course Requirements: Students will be expected to come to class prepared—most notably, to have made a serious attempt at the problems for discussion. Assessments will consist of homework, daily in-class participation, quizzes, and exams, though other types of assessments may be added at the instructor’s discretion. The final exam will be comprehensive and is scheduled for Tu, 7 May, 10:30am–12:30pm.

Grading Policy: Grades will be based on the total points accumulated on assessments. If you miss a regularly scheduled quiz/exam, the next grade of the same type will count double.

Academic dishonesty: Should questions of academic dishonesty arise, I reserve the right to assess student understanding via an oral exam; penalties can range from a warning to a failing grade for the course, depending on severity or repetition.

Extra credit: There will be no extra credit (other than, perhaps, bonus questions on exams).

Attendance Policy: Attendance is expected and roll will be checked every day. Students who miss no more than three class days may receive special consideration in determining their grade.
Course description: Survey of topics from classical Euclidean geometry, modern Euclidean geometry, projective geometry, transformational geometry and non-Euclidean geometries.

Credit hours: 3

The following is an excerpt from SFA Policy 5.4:
The federal definition of a credit hour is an amount of work represented in intended learning outcomes and verified by evidence of student achievement that is an institutionally established equivalency that reasonably approximates:

1. Not less than one hour of classroom or direct faculty instruction and a minimum of two hours out-of-class student work each week for approximately fifteen weeks for one semester or trimester hour of credit, or 10 to 12 weeks for one quarter hour of credit, or the equivalent amount of work over a different amount of time, or;

2. At least an equivalent amount of work as outlined in item 1 above for other academic activities as established by the institution including laboratory work, internships, practica, studio work, and other academic work leading to the award of credit hours.

To this end, all students in courses offered by the Department of Mathematics and Statistics that wish to be successful should plan to spend a minimum of two hours outside of class for every credit hour associated with this course. Expected activities to be completed in the time outside of class include reviewing notes from previous class meetings, reading assigned course resources, completing all assigned exercises and projects, and performing periodic assessment preparation.

Course Prerequisites and Corequisites: See general course prerequisites.

Course outline:

- Basic Definitions and Axioms
  - Introduction to Axiomatic Systems and Proof
  - Role of Examples and Models
  - Incidence Axioms
  - Distance Axioms
  - Plane Separation Postulate

- Triangles, Quadrilaterals and Circles
  - Triangles, Congruence
  - SAS Axiom and Taxicab Geometry
  - ASA, SSS Congruence and Perpendicular Bisector Theorem
  - Inequality Theorems
  - Other Congruence Criteria (SsA, HA, HL, etc.)
  - Quadrilaterals
  - Circles (all results possible without accepting a parallel postulate)

- Euclidean Geometry
  - Euclidean Parallel Postulate, Rectangles
  - Parallelograms and Parallel projection
  - Similarity
  - Right Angle Trigonometry
  - Circles With a Parallel Postulate
  - Area And Volume

- Transformational Geometry
  - Reflections, Translations, Rotations and Other Isometries

Approximate time spent

25%

25%

25%

15%
Math 3370 College Geometry
Syllabus Continuation

- Other Linear Transformations
  - Non-Euclidean Geometry
    - Hyperbolic Geometry
    - Models for Hyperbolic Geometry

This course meets educator preparation standards for one or more certification programs; a complete listing of all the educator preparation standards this course meets can be found at: https://sfasu.edu/docs/jacksteach/jacksteach-standards-alignment-chart.xlsx.

Program Learning Outcomes (PLO): Students graduating from SFA with a B.S. Degree and a major in mathematics will:
1. Written Communication - SFA Mathematics majors communicate mathematical ideas effectively in written form, integrating mathematical notation correctly and consistently.
2. Verbal Communication - SFA Mathematics majors communicate mathematics effectively to diverse audiences.
3. Mathematical Maturation - SFA Mathematics majors grow from a computational understanding of mathematics to an integrated approach which includes critical thinking proficiency, computational facility, conceptual understanding, and problem-solving persistence.

Student Learning Outcomes (SLO): At the end of the semester, successful students will be able to:
1. Use axioms, definitions and given theorems to prove properties of a geometry. [PLO: 1,2,3]
2. Show how a model for a geometry can serve to prove independence of a set of axioms. [PLO: 1,2,3]
3. Prove two triangles are congruent under varying sets of hypotheses (the traditional SAS, SSS, ASA, AAS proofs). [PLO: 1,2,3]
4. Use the Inequality Theorems for triangles to establish relationships between measures of sides and angles of triangles. [PLO: 1,2,3]
5. Use the properties and proven theorems concerning circles to establish congruence of triangles. [PLO: 1,2,3]
6. Understand that the difference between absolute, Euclidean, hyperbolic, and other classical geometries is the parallel postulate (or absence of one), and that this difference is what establishes the independence of the Euclidean Parallel Postulate. [PLO: 1,2,3]
7. Use parallel projection and similar triangles to prove congruence of angles or constance of ratios of sides. [PLO: 1,2,3]
8. Use the Pythagorean Theorem, Law of Sines, Law of Cosines and right triangle trigonometry. [PLO: 1,2,3]
9. Use and write mappings which describe translations, rotations, and other geometric transformations. [PLO: 1,2,3]
10. Prove theorems in a geometry besides Euclidean geometry (usually hyperbolic geometry) to understand their dependence on the accepted axiom set. [PLO: 1,2,3]

Academic Integrity
The Code of Student Conduct and Academic Integrity outlines the prohibited conduct by any student enrolled in a course at SFA. It is the responsibility of all members of all faculty, staff, and students to adhere to and uphold this policy.

Articles IV, VI, and VII of the new Code of Student Conduct and Academic Integrity outline the violations and procedures concerning academic conduct, including cheating, plagiarism, collusion, and misrepresentation. Cheating includes, but is not limited to: (1) Copying from the test paper (or other assignment) of another student, (2) Possession and/or use during a test of materials that are not authorized by the person giving the test, (3) Using, obtaining, or attempting to obtain by any means the whole or any part of a non-administered test, test key, homework solution, or computer program, or using a test that has been administered in prior classes or semesters without permission of the Faculty member, (4) Substituting for another person, or permitting another person to substitute for one’s self, to take a test, (5) Falsifying research data, laboratory reports, and/or other records or academic work offered for credit, (6) Using any sort of unauthorized resources or technology in completion of educational activities.

Plagiarism is the appropriation of material that is attributable in whole or in part to another source or the use of one’s own previous work in another context without citing that it was used previously, without any indication of the original source, including words, ideas, illustrations, structure, computer code, and other expression or media, and presenting that material as one’s own academic work being offered for credit or in conjunction with a program course or degree requirements.
Collusion is the unauthorized collaboration with another person in preparing academic assignments offered for credit or collaboration with another person to commit a violation of any provision of the rules on academic dishonesty, including disclosing and/or distributing the contents of an exam.

Misrepresentation is providing false grades or résumés; providing false or misleading information in an effort to receive a postponement or an extension on a test, quiz, or other assignment for the purpose of obtaining an academic or financial benefit for oneself or another individual or to injure another student academically or financially.

**Withheld Grades Semester Grades (SFA Policy 5.5)**

Ordinarily, at the discretion of the instructor of record and with the approval of the academic chair/director, a grade of WH will be assigned only if the student cannot complete the course work because of unavoidable circumstances. Students must complete the work within one calendar year from the end of the semester in which they receive a WH, or the grade automatically becomes an F. If students register for the same course in future terms the WH will automatically become an F and will be counted as a repeated course for the purpose of computing the grade point average. The circumstances precipitating the request must have occurred after the last day in which a student could withdraw from a course. Students requesting a WH must be passing the course with a minimum projected grade of C. For additional information, go to [https://www.sfasu.edu/policies/course-grades-5.5.pdf](https://www.sfasu.edu/policies/course-grades-5.5.pdf).

**Students with Disabilities**

To obtain disability related accommodations, alternate formats and/or auxiliary aids, students with disabilities must contact the Office of Disability Services (ODS), Human Services Building, and Room 325, 468-3004 / 468-1004 (TDD) as early as possible in the semester. Once verified, ODS will notify the course instructor and outline the accommodation and/or auxiliary aids to be provided. Failure to request services in a timely manner may delay your accommodations. For additional information, go to [http://www.sfasu.edu/disabilityservices](http://www.sfasu.edu/disabilityservices).

**Student Wellness and Well-Being**

SFA values students’ overall well-being, mental health and the role it plays in academic and overall student success. Students may experience stressors that can impact both their academic experience and their personal well-being. These may include academic pressure and challenges associated with relationships, emotional well-being, alcohol and other drugs, identities, finances, etc.

If you are experiencing concerns, seeking help, SFA provides a variety of resources to support students’ mental health and wellness. Many of these resources are free, and all of them are confidential.

**On-campus Resources:**

**The Dean of Students Office** (Rusk Building, 3rd floor lobby)
[www.sfasu.edu/deanofstudents](http://www.sfasu.edu/deanofstudents)
936.468.7249
donofstudents@sfasu.edu

**SFA Human Services Counseling Clinic** Human Services, Room 202
[www.sfasu.edu/humanservices/139.asp](http://www.sfasu.edu/humanservices/139.asp)
936.468.1041

**The Health and Wellness Hub “The Hub”**
Location: corner of E. College and Raguet St.

To support the health and well-being of every Lumberjack, the Health and Wellness Hub offers comprehensive services that treat the whole person – mind, body and spirit. Services include:

- Health Services
- Counseling Services
- Student Outreach and Support
- Food Pantry
- Wellness Coaching
- Alcohol and Other Drug Education

Acceptable Student Behavior

Classroom behavior should not interfere with the instructor’s ability to conduct the class or the ability of other students to learn from the instructional program (see the Student Conduct Code, policy 10.4). Unacceptable or disruptive behavior will not be tolerated. Students who disrupt the learning environment may be asked to leave class and may be subject to judicial, academic or other penalties. This prohibition applies to all instructional forums, including electronic, classroom, labs, discussion groups, field trips, etc. The instructor shall have full discretion over what behavior is appropriate/inappropriate in the classroom.
